Table of Contents

Preface............................................................................................................................................xviii

Section 1
Big Data Analysis Methods and Applications

Chapter 1
Advanced Datamining Using RNAseq Data..................................................................................1
  Yan Guo, Vanderbilt University, USA
  Shilin Zhao, Vanderbilt University, USA
  Margot Bjoring, Vanderbilt University, USA
  Leng Han, MD Anderson Cancer Center, USA

Chapter 2
Text Mining on Big and Complex Biomedical Literature...........................................................21
  Boya Xie, East Carolina University, USA
  Qin Ding, East Carolina University, USA
  Di Wu, Drexel University, USA

Chapter 3
Interactive Data Visualization Techniques Applied to Healthcare Decision Making...................46
  Zhecheng Zhu, National Healthcare Group, Singapore
  Heng Bee Hoon, National Healthcare Group, Singapore
  Kiok-Liang Teow, National Healthcare Group, Singapore

Chapter 4
Large-Scale Regulatory Network Analysis from Microarray Data: Application to Seed Biology.......60
  Anamika Basu, Gurudas College, India
  Anasua Sarkar, SMIEEE Government College of Engineering and Leather Technology, India

Chapter 5
Detection and Employment of Biological Sequence Motifs ................................................................. 86
Marjan Trutschl, Louisiana State University – Shreveport, USA & Louisiana State University Health – Shreveport, USA
Phillip C. S. R. Kilgore, Louisiana State University – Shreveport, USA
Rona S. Scott, Louisiana State University Health – Shreveport, USA
Christine E. Birdwell, Louisiana State University Health – Shreveport, USA
Urška Cvetk, Louisiana State University – Shreveport, USA & Louisiana State University Health – Shreveport, USA

Chapter 6
Observer-Biased Analysis of Gene Expression Profiles ................................................................. 117
Paulo Fazendeiro, Instituto de Telecomunicações (IT), Portugal
José Valente de Oliveira, University of Algarve, Portugal

Chapter 7
Heuristic Principal Component Analysis-Based Unsupervised Feature Extraction and Its Application to Bioinformatics ................................................................. 138
Y-H. Taguchi, Chuo University, Japan
Mitsuo Iwadate, Chuo University, Japan
Hideaki Umeyama, Chuo University, Japan
Yoshiki Murakami, Osaka City University, Japan
Akira Okamoto, Aichi University of Education, Japan

Section 2
Reviews and Perspectives on Big Data Analysis

Chapter 8
The Role of Big Data in Radiation Oncology: Challenges and Potentials ........................................ 164
Issam El Naqa, McGill University, Canada

Chapter 9
Analysis of Genomic Data in a Cloud Computing Environment ...................................................... 186
Philip Groth, Bayer Pharma AG, Germany
Gerhard Reuter, Bayer Business Services GmbH, Germany
Sebastian Thieme, Humboldt-University of Berlin, Germany

Chapter 10
Pathway Analysis and Its Applications ............................................................................................... 215
Ravi Mathur, North Carolina State University, USA
Alison Motsinger-Reif, North Carolina State University, USA

Chapter 11
Computational Systems Biology Perspective on Tuberculosis in Big Data Era: Challenges and Future Goals

Amandeep Kaur Kahlon, CSIR-Central Institute of Medicinal and Aromatic Plants (CIMAP), India
Ashok Sharma, CSIR-Central Institute of Medicinal and Aromatic Plants (CIMAP), India

Chapter 12
Bioinformatics-Driven Big Data Analytics in Microbial Research

Ratna Prabha, Indian Council of Agricultural Research, India
Anil Rai, Indian Council of Agricultural Research, India
D. P. Singh, Indian Council of Agricultural Research, India

Chapter 13
Perspectives on Data Integration in Human Complex Disease Analysis

Kristel Van Steen, University of Liége, Belgium & University of Liege, Belgium
Nuria Malats, Spanish National Cancer Research Centre (CNIO), Spain

Chapter 14
Current Study Designs, Methods, and Future Directions of Genetic Association Mapping

Jami Jackson, North Carolina State University, USA
Alison Motsinger-Reif, North Carolina State University, USA

Chapter 15
Personalized Disease Phenotypes from Massive OMICs Data

Hans Binder, University of Leipzig, Germany
Lydia Hopp, University of Leipzig, Germany
Kathrin Lembcke, University of Leipzig, Germany
Henry Wirth, University of Leipzig, Germany

Section 3
Issues and Concerns in the Big Data Era

Chapter 16
Intellectual Property Protection for Synthetic Biology, Including Bioinformatics and Computational Intelligence

Matthew K. Knabel, Fernandez & Associates, LLP, USA
Katherine Doering, Fernandez & Associates, LLP, USA & JD Candidate, University of Nebraska, USA
Dennis S. Fernandez, Fernandez & Associates, LLP, USA

Chapter 17
Clinical Data Linkages in Spinal Cord Injuries (SCI) in Australia: What Are the Concerns?

Jane Moon, University of Melbourne, Australia
Mary P. Galea, University of Melbourne, Australia
Megan Bohensky, Royal Melbourne Hospital, Australia
Chapter 18
The Benefits of Big Data Analytics in the Healthcare Sector: What Are They and Who
Benefits?

Andrea Darrel, University of Southern Queensland, Australia
Margee Hume, University of Southern Queensland, Australia
Timothy Hardie, Lakehead University, Canada
Jeffery Soar, University of Southern Queensland, Australia
