Preface .......................................................................................................................................................... vii

Section I: Introduction

Chapter I
Computational Intelligence Applications in Business: A Cross-Section of the Field ................................................................. 1
  Kevin E. Voges, University of Canterbury, New Zealand
  Nigel K. Ll. Pope, Griffith University, Australia

Chapter II
Making Decisions with Data: Using Computational Intelligence within a Business Environment .................................................................................. 19
  Kevin Swingler, University of Stirling, Scotland
  David Cairns, University of Stirling, Scotland

Chapter III
Computational Intelligence as a Platform for a Data Collection Methodology in Management Science .......................................................... 38
  Kristina Risom Jespersen, Aarhus School of Business, Denmark

Section II: Marketing Applications

Chapter IV
Heuristic Genetic Algorithm for Product Portfolio Planning ........................................... 55
  Jianxin (Roger) Jiao, Nanyang Technological University, Singapore
  Yiyang Zhang, Nanyang Technological University, Singapore
  Yi Wang, Nanyang Technological University, Singapore
Chapter V
Modeling Brand Choice Using Boosted and Stacked Neural Networks ...................... 71
Rob Potharst, Erasmus University Rotterdam, The Netherlands
Michiel van Rijthoven, Oracle Nederland BV, The Netherlands
Michiel C. van Wezel, Erasmus University Rotterdam, The Netherlands

Chapter VI
Applying Information Gathering Techniques in Business-to-Consumer and Web Scenarios ..................................................................................................................... 91
David Camacho, Universidad Autónoma de Madrid, Spain

Chapter VII
Web-Mining System for Mobile-Phone Marketing .................................................. 113
Miao-Ling Wang, Minghsin University of Science & Technology, Taiwan, ROC
Hsiao-Fan Wang, National Tsing Hua University, Taiwan, ROC

Section III: Production and Operations Applications

Chapter VIII
Artificial Intelligence in Electricity Market Operations and Management ............ 131
Zhao Yang Dong, The University of Queensland, Australia
Tapan Kumar Saha, The University of Queensland, Australia
Kit Po Wong, The Hong Kong Polytechnic University, Hong Kong

Chapter IX
Reinforcement Learning-Based Intelligent Agents for Improved Productivity in Container Vessel Berthing Applications ................................................................. 155
Prasanna Lokuge, Monash University, Australia
Damminda Alahakoon, Monash University, Australia

Chapter X
Optimization Using Horizon-Scan Technique: A Practical Case of Solving an Industrial Problem .................................................................................................... 185
Ly Fie Sugianto, Monash University, Australia
Framesh Chand, Monash University, Australia

Section IV: Data Mining Applications

Chapter XI
Visual Data Mining for Discovering Association Rules ............................................ 209
Kesaraporn Techapichetvanich, The University of Western Australia, Australia
Amitava Datta, The University of Western Australia, Australia
Chapter XII
Analytical Customer Requirement Analysis Based on Data Mining .................. 227
  Jianxin (Roger) Jiao, Nanyang Technological University, Singapore
  Yiyang Zhang, Nanyang Technological University, Singapore
  Martin Helander, Nanyang Technological University, Singapore

Chapter XIII
Visual Grouping of Association Rules by Clustering Conditional Probabilities for
  Categorical Data ..................................................................................................... 248
  Sasha Ivkovic, University of Ballarat, Australia
  Ranadhir Ghosh, University of Ballarat, Australia
  John Yearwood, University of Ballarat, Australia

Chapter XIV
Support Vector Machines for Business Applications ............................................. 267
  Brian C. Lovell, NICTA & The University of Queensland, Australia
  Christian J. Walder, Max Planck Institute for Biological Cybernetics, Germany

Chapter XV
Algorithms for Data Mining .................................................................................... 291
  Tadao Takaoka, University of Canterbury, New Zealand
  Nigel K. Ll. Pope, Griffith University, Australia
  Kevin E. Voges, University of Canterbury, New Zealand

Section V: Management Applications

Chapter XVI
A Tool for Assisting Group Decision-Making for Consensus Outcomes in
  Organizations ........................................................................................................... 316
  Faezeh Afshar, University of Ballarat, Australia
  John Yearwood, University of Ballarat, Australia
  Andrew Stranieri, University of Ballarat, Australia

Chapter XVII
Analyzing Strategic Stance in Public Services Management: An Exposition of
  NCaRBS in a Study of Long-Term Care Systems .................................................... 344
  Malcolm J. Beynon, Cardiff University, UK
  Martin Kitchener, University of California, USA

Chapter XVIII
The Analytic Network Process – Dependence and Feedback in Decision-Making:
  Theory and Validation Examples ............................................................................. 360
  Thomas L. Saaty, University of Pittsburgh, USA
Section VI: Financial Applications

Chapter XIX
Financial Classification Using an Artificial Immune System ........................................ 388
Anthony Brabazon, University College Dublin, Ireland
Alice Delahunty, University College Dublin, Ireland
Dennis O’Callaghan, University College Dublin, Ireland
Peter Keenan, University College Dublin, Ireland
Michael O’Neill, University of Limerick, Ireland

Chapter XX
Development of Machine Learning Software for High Frequency Trading in
Financial Markets ........................................................................................................ 406
Andrei Hryshko, University of Queensland, Australia
Tom Downs, University of Queensland, Australia

Chapter XXI
Online Methods for Portfolio Selection ......................................................................... 431
Tatsiana Levina, Queen’s University, Canada

Section VII: Postscript

Chapter XXII
Ankle Bones, Rogues, and Sexual Freedom for Women: Computational Intelligence
in Historical Context .................................................................................................... 461
Nigel K. Ll. Pope, Griffith University, Australia
Kevin E. Voges, University of Canterbury, New Zealand

About the Authors ........................................................................................................ 469

Index .......................................................................................................................... 478
