# Table of Contents

**Preface** ................................................................................................................................................. xxiii

**Volume 1**

**Chapter 1**
Gait Generation and Transition of a Biped Robot Based on Kinematic Synergy in Human Locomotion .............................................................................................................................................................. 1  
*Shinya Aoi, Kyoto University, Japan*

**Chapter 2**
MEMS Microrobot with Pulse-Type Hardware Neural Networks Integrated Circuit .................. 18  
*Ken Saito, Nihon University, Japan*
*Minami Takato, Nihon University, Japan*
*Yoshifumi Sekine, Nihon University, Japan*
*Fumio Uchikoba, Nihon University, Japan*

**Chapter 3**
EMG-Based Control of a Multi-Joint Robot for Operating a Glovebox ........................................... 36  
*Toshio Tsuji, Hiroshima University, Japan*
*Taro Shibanoki, Ibaraki University, Japan*
*Keisuke Shima, Yokohama National University, Japan*

**Chapter 4**
Classification of the Emotional State of a Subject Using Machine Learning Algorithms for RehabRoby ................................................................................................................................................. 53  
*Duygun Erol Barkana, Yeditepe University, Turkey*
*Engin Masazade, Yeditepe University, Turkey*

**Chapter 5**
Bio-Inspired Polarization Vision Techniques for Robotics Applications ........................................ 81  
*Abd El Rahman Shabayek, Suez Canal University, Egypt*
*Olivier Morel, Université de Bourgogne, France*
*David Fofi, Université de Bourgogne, France*
Chapter 6
State of the Art in Biomimetic Swimming Robots: Design Principles and Case Study .......................... 118
   Sayyed Farideddin Masoomi, University of Canterbury, New Zealand
   Stefanie Gutschmidt, University of Canterbury, New Zealand
   XiaoQi Chen, University of Canterbury, New Zealand

Chapter 7
Fundamental Control for a Manta-Like Fish Robot .................................................................................. 153
   Masaaki Ikeda, Universiti Sultan Zainal Abidin, Malaysia
   Keigo Watanabe, Okayama University, Japan
   Isaku Nagai, Okayama University, Japan

Chapter 8
Mobile Worm-Like Robots for Pipe Inspection .......................................................................................... 168
   Sergey Fedorovich Jatsun, South-West State University, Russia
   Andrei Vasilevich Malchikov, South-West State University, Russia

Chapter 9
Awareness-Based Recommendation toward a New Preference: Evaluation of the Awareness Effect ................................................................. 219
   Tomohiro Yamaguchi, Nara National College of Technology, Japan
   Takuma Nishimura, NTT Neomeit, Japan
   Keiki Takadama, The University of Electro-Communications, Japan

Chapter 10
From Concept to Market: Surgical Robot Development ............................................................................. 242
   Tamas Haidegger, Óbuda University, Hungary & Austrian Center for Medical Innovation and Technology (ACMIT), Austria
   Imre J Rudas, Óbuda University, Hungary

Chapter 11
Cable-Driven Robot for Upper and Lower Limbs Rehabilitation ................................................................. 284
   Rogério Sales Gonçalves, Federal University of Uberlândia, Brazil
   João Carlos Mendes Carvalho, Federal University of Uberlândia, Brazil
   José Francisco Ribeiro, Federal University of Uberlândia, Brazil
   Vitor Vieira Salim, Federal University of Uberlândia, Brazil

Chapter 12
Human-Inspired Robotic Exoskeleton for Post-Stroke Gait Rehabilitation: Design, Modelling, Control, and Experimental Testing ............................................................... 316
   Kazuto Kora, The University of Auckland, New Zealand
   Shane Xie, The University of Auckland, New Zealand
   Andrew McDaid, The University of Auckland, New Zealand
Chapter 13
Structural Condition Monitoring with the Use of the Derivative-Free Nonlinear Kalman Filter

Gerasimos Rigatos, Industrial Systems Institute, Greece
Argyris Soldatos, National Technical University of Athens, Greece

Chapter 14
Dynamic Modeling and Control Techniques for a Quadrotor

Heba Elkholy, American University in Cairo, Egypt
Maki K. Habib, American University in Cairo, Egypt

Chapter 15
Kinodynamic Motion Planning for an X4-Flyer

Kimiko Motonaka, Okayama University, Japan
Keigo Watanabe, Okayama University, Japan
Shoichi Maeyama, Okayama University, Japan

Volume 2

Chapter 16
Control of a Biomimetic Robot Hand Finger: Classical, Robust, and Intelligent Approaches

Yunus Ziya Arslan, Istanbul University, Turkey
Yuksel Hacioglu, Istanbul University, Turkey
Yener Taskin, Istanbul University, Turkey
Nurkan Yagiz, Istanbul University, Turkey

Chapter 17
Comparison of Control Strategies by the Example of the Cooling Fan Control of a Mobile Machine

Kai Borgeest, Aschaffenburg University of Applied Sciences, Germany
Peter Josef Schneider, Continental Teves AG & Co. oHG, Germany

Chapter 18
Design of Hexapod Walking Robots: Background and Challenges

Franco Tedeschi, University of Cassino and South Lazio, Italy
Giuseppe Carbone, University of Cassino and South Lazio, Italy

Chapter 19
Mechatronic Design of Mobile Robots for Stable Obstacle Crossing at Low and High Speeds

Jean-Christophe Fauroux, Clermont University, France
Frédéric Chapelle, Clermont University, France
Belhassen-Chedli Bouzgarrou, Clermont University, France
Philippe Vaslin, Clermont University, France
Mohamed Krid, Clermont University, France
Marc Davis, Clermont University, France
Chapter 20
Tracking Control of a Nonholonomic Mobile Robot Using Neural Network.......................... 631
Şahin Yıldırım, Erciyes University, Turkey
Sertaç Savaş, Erciyes University, Turkey

Chapter 21
Modeling and Visual Navigation of Autonomous Surface Vessels ........................................ 662
Jian Hong Mei, Universiti Sains Malaysia, Malaysia
Mohd Rizal Arshad, Universiti Sains Malaysia, Malaysia

Chapter 22
A Framework for RF-Visual SLAM for Cooperative Multi-Agent System.............................. 697
Herdawatie Abdul Kadir, Universiti Sains Malaysia, Malaysia
Mohd Rizal Arshad, Universiti Sains Malaysia, Malaysia

Chapter 23
Mission Design of a Team of Service Robots............................................................................. 728
Elias K. Xidias, University of the Aegean, Greece
Nikos A. Aspragathos, University of Patras, Greece
Philip N. Azariadis, University of the Aegean, Greece

Chapter 24
Wheelchair Secure Navigation with RF Signal Triangulation and Genetic Algorithm Optimization ................................................................................................................. 750
Leonimer Flávio de Melo, State University of Londrina, Brazil
Evandro Junior Rodrigues, State University of Londrina, Brazil
João Maurício Rosário, State University of Campinas, Brazil

Chapter 25
Industrial Machining Robot with Incorporated Robotic CAM System ....................................... 793
Fusaomi Nagata, Tokyo University of Science, Japan
Akimasa Otsuka, Tokyo University of Science, Japan
Keigo Watanabe, Okayama University, Japan
Maki K. Habib, The American University in Cairo, Egypt
Takamasu Kusano, SOLIC Co., Ltd., Japan

Chapter 26
Distributed Robots Path/Tasks Planning on Fetch Scheduling..................................................... 818
Nilda G. Villanueva-Chacón, Universidad Autónoma de Ciudad Juárez, Mexico
Edgar A. Martínez-García, Universidad Autónoma de Ciudad Juárez, Mexico

Chapter 27
Robotic System Design and Development for Medical Treatment, Surgery, and Automated Production Applications........................................................................................................... 851
Zheng (Jeremy) Li, University of Bridgeport, USA
Chapter 28
Novel Method of Assessing Practical Intelligence Acquired in Mechatronics Laboratory Classes:
Novices-Experts Methods .................................................................................................................. 895
Zol Bahri Razali, Universiti Malaysia Perlis, Malaysia

Chapter 29
Robotics Community Experiences: Leveraging Informal Design and Learning Experiences to
Motivate Urban Youth in STEM ........................................................................................................ 929
Kimberley Gomez, UCLA, USA
Debra Bernstein, TERC, USA
Jolene Zywica, Opportunity Education Foundation, USA
Emily Hamner, Carnegie Mellon University, USA
Ung-Sang Lee, UCLA, USA
Jahneille Cunningham, UCLA, USA

Chapter 30
Mechatronic System Design for a Solar Tracker ............................................................................. 958
H. Henry Zhang, Purdue University, USA
Li-Zhe Tan, Purdue University North Central, USA
Wangling Yu, Purdue University North Central, USA
Simo Meskouri, Chrysler Technology Center, USA
