# Table of Contents

Foreword ........................................................................................................................................... xvii

Preface ................................................................................................................................................ xix

Acknowledgment ............................................................................................................................ xxv

## Section 1
### Perception and Cognition

**Chapter 1**
Cognitive Learning with Electronic Media and Social Networking ............................................. 1  
*Anna Ursyn, University of Northern Colorado, USA*

**Chapter 2**
Sensory Extension as a Tool for Cognitive Learning ................................................................. 72  
*Michael Eisenberg, University of Colorado, USA*  
*Ann Eisenberg, University of Colorado, USA*

**Chapter 3**
Simultaneous Perception of Parallel Streams of Visual Data .................................................. 84  
*Marcin Brzezicki, Wroclaw University of Technology, Poland*

## Section 2
### Art-Math-Science Connection

**Chapter 4**
Visualization and Mathematical Thinking .................................................................................. 103  
*Hervé Lehning, AC-HL, France*

**Chapter 5**
Duality of Natural and Technological Explanations ................................................................ 113  
*Anna Ursyn, University of Northern Colorado, USA*

**Chapter 6**
Random Processes and Visual Perception: Stochastic Art .................................................... 200  
*Jean Constant, Hermay.org, USA*
Chapter 7
Science of the Archives: Visual Learning about Plants .................................................. 213
Maura C. Flannery, St. John's University, USA

Section 3
Cognitive Computing and Programming

Chapter 8
Visualization by Coding: Drawing Simple Shapes and Forms in Various Programming
Languages .................................................................................................................. 243
Anna Ursyn, University of Northern Colorado, USA
Mehrgan Mostowfi, University of Northern Colorado, USA

Chapter 9
Building a Computer .................................................................................................. 312
Andrew Liccardo, University of Northern Colorado, USA
Cameron Grimes, University of Northern Colorado, USA

Chapter 10
Programming and Problem Solving through Knowledge Visualization .......................... 326
Alireza Ebrahimi, State University of New York at Old Westbury, USA

Section 4
Visual Interpretations

Chapter 11
Connecting the Dots: Art, Culture, Science, and Technology ....................................... 345
Jing Zhou, Monmouth University, USA

Chapter 12
Re-Visualising Giotto’s 14th-Century Assisi Fresco “Exorcism of the Demons at Arezzo” ....... 358
Theodor G. Wyeld, Flinders University, Australia

Chapter 13
Visualization in Learning: Perception, Aesthetics, and Pragmatism ................................ 381
Veslava Osinska, Nicolaus Copernicus University, Poland
Grzegorz Osinski, College of Social and Media Culture, Poland
Anna Beata Kwiatkowska, Nicolaus Copernicus University, Poland

Chapter 14
Analyzing Disney’s Early Exhibits as Installation Art Work ............................................. 415
Jonathan Lillie, Loyola University Maryland, USA
Michelle Jones-Lillie, Lillie Pad Studios, LLC, USA
Section 5
Cognitive Creativity

Chapter 15
Digitally Mediated Art Inspired by Scientific Research: A Personal Journey ........................................ 436
John Antoine Labadie, Jumbo Arts International, USA & University of North Carolina – Pembroke, USA

Chapter 16
On Creativity of Asian and American Asian Students ................................................................. 472
Joohyun Pyune, Essex County College, USA

Chapter 17
AiryLight: Ambient Environmental Data ......................................................................................... 487
Annelie Berner, Columbia University, USA

Section 6
Visualizing Teaching and Learning

Chapter 18
What Does Learning Look Like? Data Visualization of Art Teaching and Learning .................. 494
Pamela G. Taylor, Virginia Commonwealth University, USA

Chapter 19
Bringing the Arts as Data to Visualize How Knowledge Works ............................................. 515
Lihua Xu, University of Central Florida, USA
Read Diket, William Carey University, USA
Thomas Brewer, University of Central Florida, USA

Compilation of References ........................................................................................................... 535

About the Contributors .................................................................................................................. 563
