This text would not have been possible without a brilliant meeting of gifted minds. First and foremost, I want to thank all of the talented and esteemed authors who shared their latest engrossing findings in the area of assistive technologies to support individuals with a variety of developmental disabilities. I look forward to our future correspondence and collaboration. Secondly, I’d like to graciously thank the peer reviewers who meticulously evaluated the relevance of content, syntax and empirical rigor of each chapter. Thank you Dr. Michael Ben-Avie (Yale University), Tamara Balaban, MSOTR/L (Support by Design), Dr. Jody Marie Bartz (Northern Arizona University), Dr. Ariel Brandwein (Long Island Jewish Medical Center), Dr. Cathi Draper Rodriguez (California State University), Dr. Kristen Gillepsie (CUNY Graduate Center, College of Staten Island), Emily Hotez, M.A. (CUNY Graduate Center, Hunter College), Toby Mehl, M.S., CCC-SLP (CUNY Graduate Center, Brooklyn College), Dr. Brenda Myles (Ohio Center for Autism and Low Incidence), Christina Shane-Simpson (CUNY Graduate Center, College of Staten Island), Shira Silton, LMSW (Montefiore Medical Center), Dr. Linda Solomon (Marymount Manhattan College), and Dr. Peggy Whitby (University of Arkansas).

Marymount Manhattan College (MMC) students Senada Aruvecic ‘14, Alicia Ferris ‘16, Jaromir Myszczynski ‘14, Rebecca Ruchlin ‘14, and Yolianda Zackschewski ‘15 graciously offered their assistance in the early stages of this project. It did not take long before they were genuinely moved and inspired by the innovative research in this area. I thank Dr. Benedetta Sampoli Benitez, a wonderful Divisional Chair at MMC, for her constant guidance and encouragement and the administration, psychology faculty and general faculty at Marymount Manhattan College for their continuous support and appreciation for this important field.

Additionally, I am grateful to Allyson Gard, Rachel Ginder, Caitlyn Martin, Jan Travers, and Kayla Wolfe for their invaluable guidance during the editing process. They were always prompt, comprehensive, patient and gracious in their responses.

Moreover, I would like to thank my dedicated husband, Ariel Brandwein and my charming little men, Judah Lior and Jonah Gabriel Brandwein, for their good nature, humor, inspiration and patience throughout this endeavor. I want to acknowledge my father, Rabbi Paul Silton and my wonderful siblings, Elana, Michal, Akiva, Tamar, Aviva, and my twin sister Shira for their constant encouragement and support. Finally, I owe a huge debt of gratitude to a consummate renaissance woman and to one of my greatest heroines, my mother, Faye Silton. Her creativity, eloquence, wisdom, patience and love know no bounds. I will cherish this text all the more since her brilliant mind and loving hands painstakingly reviewed its contents.

I want to extend a final note of gratitude to all of the incredible parents, teachers, special educators, technology specialists, researchers, siblings, family members and peers of children with developmental disabilities. Each of you works tirelessly to creatively endow your loved ones and students with the very best technologies, tools and instruction to best support and enhance their development and potential. I hope that this text will further broaden their opportunities and enhance their level of comfort in accessing technologies that are best suited for them. Finally, I would like to thank our exceptional children with differences, who have inspired the advancement of these technologies and continue to challenge our traditional approaches in favor of divergent thinking and creative problem-solving. It is these glorious minds who will inspire a true “community,” which is sensitive to diverse needs, learning styles and capabilities and will pioneer these new, cutting edge technologies.
