Acknowledgment

The editors would firstly like to acknowledge all the people involved in this project and, more specifically, the authors and other reviewers that took part in the review process. Without their active support, this book would not have become a reality.

Secondly, the editors would like to thank each one of the authors for their contributions; please accept our sincere thanks for your time and expertise.

Third, the editors wish to acknowledge the valuable contributions of the reviewers in improving the quality, coherence, and the content presentation of the chapters. Many of the authors also served as referees; we highly appreciate their double task.

Thirdly, we gratefully acknowledge the important contribution made by the Ritsumeikan Asia Pacific University’s Academic Publication Subsidy Fund towards translation and copyediting of several of the chapters in this volume. Without this subsidy we would have been unable to complete the book.

Lastly, we want to thank our families and friends, whose quiet support kept the project alive.
