Acknowledgment

First of all, I am very grateful to my Lord Almighty ALLAH who helped and guided me throughout my life and made it possible. I could never have done it by myself! My sincere thanks to the authors of different chapters whose invaluable contributions, help me in completing this book, also thanks to the authors whose manuscript was not included due to rigorous review based selection process. I would like to mention here that all authors are so cooperative during different stages of book development process. I am also beholden to the IGI Global team and Miss Rachel Ginder for assisting me throughout this project. I wish to include here a word of appreciation to them for smoothly and efficiently handling the project. I would also like to thank my wife Momtaz Begum and my children Zabeer Ahmed and Zawad Ahmed for their patience and support. My special thanks to Mrs. Sufia Khaton (dearest mother), for the motivation that has encouraged me to keep going.
