Acknowledgment

This book integrates the results of ten years of research in social and environmental accounting. This is a synthesis of the extensive work that authors performed within three research projects founded through Romanian National Plan for Research, Development and Innovation.

We would like to thank all the colleagues, reviewers, editors and many other persons for participating to our research with their recommendations, discussions and debates, as well as the IGI Global staff, especially Erin O’Dea for their continuous support during the development of the book.
