Acknowledgment

Climate change is a global issue. To assess the climate change a multidimensional study is required engaging several expertise people and produce one handbook explicitly focusing on climate change and related issues. The contributions of the concerned experts all over the world make possible to prepare and produce this handbook. I should like to offer special thanks to the members of Editorial Board of Advisers for their participation and input as advisor to the editor for improvement of this book.

I am thankful to IGI Global for giving me the opportunity to edit this handbook. I offer my special thanks to Rachel Ginder, book development editor, IGI Global, for her continuous support, prompt response to my queries and fully involvement in this project. I am also grateful to all members of IGI Global who are engaged in the development of this handbook, copy-editing, layout, word processing, and also in the publication process from beginning to the final outcome.

Last but not the least I must be grateful to my wife and son, elder brother and other members of the family for their continuous incentives in carrying out this work and sacrifice as they were deprived of the opportunities to have a enjoying family lives. Finally, as an editor, I am fully responsible for the errors, if any, in this handbook.
