# Table of Contents

**Foreword** ........................................................................................................................................... xxiii

**Preface** ................................................................................................................................................ xxv

**Acknowledgment** ............................................................................................................................. xxix

**Section 1**

**Patient Adherence: Theoretical and Practical Aspects**

**Chapter 1**
Ethical Challenges in Online Health Games.......................................................................................... 1

*Matthieu J. Guitton, Laval University, Canada*

**Chapter 2**
Change through Experience: How Experiential Play and Emotional Engagement Drive Health Game Success .......................................................................................................................... 10

*Georges Elias Khalil, University at Buffalo, The State University of New York, USA & The University of Texas, M. D. Anderson Cancer Center, USA*

**Chapter 3**
Gamification and Health Literacy ........................................................................................................... 35

*Badia Faddoul, The Johns Hopkins Hospital, USA*

**Chapter 4**
Gamification to Improve Adherence to Clinical Treatment Advice: Improving Adherence to Clinical Treatment......................................................................................................................... 47

*Deborah Richards, Macquarie University, Australia*

*Patrina H.Y. Caldwell, University of Sydney, Australia*

**Chapter 5**
Gamification: Applications for Health Promotion and Health Information Technology Engagement. 78

*Hannah R Marston, German Sport University, Germany*

*Amanda K Hall, University of Washington, USA*
Chapter 6
Guidelines for Designing Effective Games as Clinical Interventions: Mechanics, Dynamics, Aesthetics, and Outcomes (MDAO) Framework ................................................................. 105
   Heather Browning, Agnitus, USA

Section 2
Gamification in Rehabilitation Healthcare

Chapter 7
Gamification in Rehabilitation: Finding the “Just-Right-Challenge” ........................................ 132
   Rachel Proffitt, University of Southern California, USA

Chapter 8
The Role of Gamification and Evolutionary Computation in the Provision of Self-Guided Speech Therapy ........................................................................................................... 158
   Conor Higgins, University of Limerick, Ireland
   Áine Kearns, University of Limerick, Ireland
   Conor Ryan, University of Limerick, Ireland
   Mikael Fernstrom, University of Limerick, Ireland

Chapter 9
Using Leap Motion and Gamification to Facilitate and Encourage Rehabilitation for Hand Injuries: Leap Motion for Rehabilitation ................................................................. 183
   Jamie Taylor, University of Kent, UK
   Kevin Curran, University of Ulster, UK

Chapter 10
Gamified Cognitive Training to Prevent Cognitive Decline .................................................. 193
   Musian Daniele, SI4Life, Italy
   Antonio Ascolese, imaginary srl, Italy

Section 3
Application of Exergames

Chapter 11
Buddy Up for Exergames: How Group Dynamics Principles Can Be Applied to Active Health Games .................................................................................................................. 222
   Alison Ede, Michigan State University, USA
   Samuel Thomas Forlenza, Shippensburg University, USA
   Deborah L. Feltz, Michigan State University, USA
Chapter 12
Online Social Exergames for Seniors: A Pillar of Gamification for Clinical Practice

Stathis Th. Konstantinidis, NORUT, Norway
Ellen Brox, NORUT, Norway
Per Egil Kummervold, NORUT, Norway
Josef Hallberg, Luleå University of Technology, Sweden
Gunn Evertsen, NORUT, Norway
Johannes Hirche, Luleå University of Technology, Sweden

Chapter 13
The Effects of Active Videogames on BMI among Young People: A Meta-Analysis

Jonathan van ’t Riet, Radboud University, The Netherlands
Eva Alblas, Radboud University, The Netherlands
Rik Crutzen, Maastricht University, The Netherlands
Amy Shirong Lu, Northeastern University, USA

Chapter 14
Making Exergames Appealing: An Assessment of Commercial Exergames

Emmanuel Agu, Worcester Polytechnic Institute, USA
Bengisu Tulu, Worcester Polytechnic Institute, USA
Amorn Chokchaisripakdee, Worcester Polytechnic Institute, USA
Nutaworn Sujumnong, Worcester Polytechnic Institute, USA
Latthapol Khachonkitkosol, Worcester Polytechnic Institute, USA

Chapter 15
Muscle Activation during Exergame Playing

Pooya Soltani, University of Porto, Portugal
João Paulo Vilas-Boas, University of Porto, Portugal

Section 4
Serious Games in Psychiatry

Chapter 16
Choices in Gamification of Therapy for PTSD

Dan Thomsen, SIFT, LLC, USA
Jeffrey M. Rye, SIFT, LLC, USA
Tammy Ott, SIFT, LLC, USA

Chapter 17
Online Prevention and Early Intervention in the Field of Psychiatry Using Gamification in Internet Interventions: Practical Experience with a Program Targeting Eating Disorders in Czech Republic

Jana Hanusová, Charles University, Czech Republic
Tereza Štěpánková, Charles University, Czech Republic
Jana Tomanová, Charles University, Czech Republic
Simona Dočkalová, Charles University, Czech Republic
Hana Papežová, Charles University, Czech Republic
Chapter 18
Gamification of Therapy: Treating Selective Mutism ................................................................. 390
  Brian E. Bunnell, University of Central Florida, USA
  Katelyn Procci, University of Central Florida, USA
  Deborah C. Beidel, University of Central Florida, USA
  Clint A. Bowers, University of Central Florida, USA

Section 5
Promoting Healthy Dietary Habits

Chapter 19
Review of Serious Games for People with Diabetes................................................................. 412
  Alexandra Makhlysheva, University Hospital of North Norway, Norway
  Eirik Arsand, University Hospital of North Norway, Norway
  Gunnar Hartvigsen, The Arctic University of Norway, Norway

Chapter 20
Integration of Communication in a Game to Reflect and Discuss Dietary Habits among School
Aged Children.......................................................................................................................... 448
  Mikio Kamada, ACORDO Corporation, Japan
  Masaki Moriyama, Fukuoka University, Japan

Chapter 21
Interactive Digital Mobile Gaming as a Strategic Tool in the Fight against Childhood Obesity ...... 475
  Carminda Goersch Lamboglia, Universidade de Fortaleza, Brazil
  Lucas de Moura Carvalho, Universidade de Fortaleza, Brazil
  Jose Eurico de Vasconcelos Filho, Universidade de Fortaleza, Brazil
  Francisco Cristiano Lopes de Sousa, Universidade de Fortaleza
  Carlos Bruno Silva, Universidade de Fortaleza, Brazil

Section 6
Various Applications of Serious Games

Chapter 22
Game Aspects in Collaborative Navigation of Blind Travelers ............................................... 497
  Jan Balata, Czech Technical University in Prague, Czech Republic
  Zdenek Mikovec, Czech Technical University in Prague, Czech Republic
  Pavel Slavik, Czech Technical University in Prague, Czech Republic
  Miroslav Macik, Czech Technical University in Prague, Czech Republic
Chapter 23
Design of a Multi-Modal Dexterity Training Interface for Medical and Biological Sciences .......... 524
Shahram Payandeh, Simon Fraser University, Canada

Compilation of References ............................................................................................................. 552
About the Contributors .................................................................................................................... 622
