Acknowledgment

My sincere gratitude goes to each chapter author who has contributed his or her time, academic wisdom, and professional expertise to this book. I wish to acknowledge all chapter reviewers who have graciously participated in the chapter review process. Reviewers have included chapter authors as well as medical, academic, and professional colleagues whose collegial support has allowed this book to become a reality. In some cases, unforeseen circumstances have delayed chapter submissions. Many thanks to those individuals who have accepted additional chapter review responsibilities to ensure that protocols and publisher deadlines were not compromised but rather adhered to in a timely manner. Please accept my sincere thanks for the extreme dedication displayed by each and every chapter reviewer in order to improve quality, coherence, and presentation of content.

I would like to convey my appreciation and thanks to illustrator Paul Lennon, whose artistic creations have brought text to life and a smile to my face many times.

Special gratitude must be attributed to Queensland University of Technology (QUT) eResearch Access Coordinator, Paula Callan, who provided me with valuable advice and direction during the early days of the book development process.

This book could not have reached completion without professional copy-editors, Dr. Rona Bernstein (www.psychediting.com) and Dr. Megan Kimber (QUT Researcher and Editor), who worked meticulously to ensure uniformity across chapters with respect to formatting, syntax, grammar, and correct punctuation.

A special thank you to Dr. Lyndall Kleinschmidt, who has guided me with outstanding professionalism through 18 years of denial and eventual acceptance of my daughter’s NLD.
