Acknowledgment

We wish to personally thank all of the authors for their contributions to our inspiration and knowledge and other help in creating this book. Thank you all of the authors who without their contributions and support this book would not have been written.

We also acknowledge the valuable contributions of the reviewers regarding the improvement of quality, coherence, and content presentation of chapters. Most of the authors also served as referees; we highly appreciate their double task.

A special thank you note should be provided for Prof Curtis Bonk from Indiana University who put the editors of this book into contact. This collaborative writing process could not have been possible without his support.

Last and not least: we beg forgiveness of all those who have been with us over the course of the past months while writing this book and whose names we have failed to mention.
