Acknowledgment

First, the editors would like to thank each one of the authors for their contributions. Our sincere gratitude goes to the chapter’s authors who contributed their time and expertise to this book.

Second, the editors wish to acknowledge the valuable contributions of the reviewers regarding the improvement of quality, coherence, and content presentation of chapters. Most of the authors also served as reviewers; we highly appreciate their double task.

The editors would like to acknowledge the help of all the other people involved in this project and, more specifically, the editorial advisory board members that took part in various aspects of the process. Without their support, extra effort and ongoing encouragement this book would not have become a reality.
