# Table of Contents

Foreword .............................................................................................................................................. xv  
Preface ................................................................................................................................................ xvii  
Acknowledgment ............................................................................................................................ xxvii  

**Section 1**  
**Establishing the Issues or Problems**

**Chapter 1**  
The Fundamentals of Water and Natural Waters ................................................................. 1  
   *Benjamin Cuker, Hampton University, USA*  
   *George Bugyi, Pennsylvania State University, USA*

**Chapter 2**  
Industrial and Agricultural Sources and Pathways of Aquatic Pollution ............................... 29  
   *Nikolaos Voulvoulis, Imperial College London, UK*  
   *Karyn Georges, Imperial College London, UK*

**Chapter 3**  
A Review of Emerging Contaminants in Water: Classification, Sources, and Potential Risks ........... 55  
   *Alexandros I. Stefanakis, University of Brighton, UK*  
   *Julie A. Becker, University of the Sciences, USA*

**Chapter 4**  
Pharmaceuticals and Personal Care Products as Emerging Water Contaminants ....................... 81  
   *Julie Becker, University of the Sciences, USA*  
   *Alexandros Stefanakis, University of Brighton, UK*

**Chapter 5**  
Impacts of Artisanal and Small-Scale Gold Mining on Water Quality in Mozambique and Zimbabwe .............................................................................................................................................. 101  
   *Never Mujere, University of Zimbabwe, Zimbabwe*  
   *Manuel Isidro, University of Zimbabwe, Zimbabwe*
Chapter 6
Cyanobacterial Toxins in Water Sources and Their Impacts on Human Health ........................................ 120
Zakaria Mohamed, Sohag University, Egypt

Chapter 7
Floodplain Infrastructure and the Toxic Tide ............................................................... 150
Sanford R. Bender, Independent Registered Architect, USA

Chapter 8
Nurses, Healthcare, and Environmental Pollution and Solutions: Breaking the Cycle of Harm .... 174
A. Elaine McKeown, Independent Researcher, USA

Section 2
Considering Possible Solutions to Issues or Problems

Chapter 9
Issues with Water Quality: How Do We Get Our Fellow Citizens to Care? ............................... 199
Rhana Smout Paris, North Carolina Aquarium on Roanoke Island, USA

Chapter 10
Design of the Education Campaign: Creating a Motivated, Environmentally Concerned Public
through Improved Scientific Literacy ................................................................. 215
M. Chad Smith, East Carolina University, USA

Chapter 11
Health Professionals Can Protect Water Quality: Tools for Educators, Advocates, and
Practitioners ........................................................................................................ 240
Rosemary Ziemba, University of Michigan, USA
Benjamin E. Cuker, Hampton University, USA
Joyce Stein, University of Michigan Health System, USA
Rebecca Meuninck, Ecology Center Ann Arbor, USA
Jiayi Angela Wan, University of Michigan, USA

Chapter 12
Constructed Wetlands: Description and Benefits of an Eco-Tech Water Treatment System .......... 281
Alexandros I. Stefanakis, University of Brighton, UK

Chapter 13
Access to Safe Drinking Water: A Low Income Sustainable Water Purification System .......... 304
Robert Cecil Willems, Leamis International Ministries, USA
Steve A. MacDonald, Dare County Schools, USA
