Acknowledgment

First and foremost, I would like to thank the 28 authors from 6 different countries spanning Asia, Europe and Africa (United States, Turkey, Albania, Zimbabwe, India, and Thailand) who have contributed to this volume with 19 original chapters. All of these chapters touch some interesting aspects of waste management and sustainability, and will benefit the readers who would like to explore this challenging issue in detail.

My thanks also go to the members of the Editorial Advisory Board whose advice and presence have made this volume possible.

It is impossible not to state the contributions made by the professional staff of the publisher IGI Global. First of all they accepted my proposal to publish a book in this area which is growing in importance. Second, their quality and speed of the post processing and recommendations made during the book publication process resulted in a fast and efficient publication.

Finally I would like to thank the Turkish National Committee on Solid Waste (TNCSW).
