The editors would like to acknowledge the help of all the people involved in this project and, more specifically, the authors and reviewers who took part in the review process. Their effort was an excellent and relevant contribution to this publication process. Without their support, this book would not have become a reality.

First, the editors would like to thank each of the chapters’ authors who contributed with their time and expertise to this book.

Second, the editors wish to acknowledge the excellent and valuable work of the Editorial Advisory Board members regarding the improvement of quality, coherence, and content presentation of chapters which ensured the highest accuracy in the double-blinded review process. Most of the authors also served as referees; we highly appreciate their double task.
