Table of Contents

Preface ........................................................................................................................................... xvii

Acknowledgment .......................................................................................................................... xviii

Chapter 1
Optimal Ordering for Deteriorating Items of Fixed-Life with Quadratic Demand and Two-Level Trade Credit: Optimal Ordering ... Two-Level Trade Credits ......................................................................................................................................................... 1

  Nita H. Shah, Gujarat University, India
  Mrudul Yogeshkumar Jani, Parul University, India

Chapter 2
Lot Size Model for Reverse Logistics with Quadratic Demand .............................. 17

  Digeshkumar Bipinchandra Shah, L. D. College of Engineering, India
  Dushyantkumar G. Patel, Govt. Polytechnic for Girls, India
  Nita Shah, Gujarat University, India

Chapter 3
Application of Genetic Algorithms in Inventory Control .................................. 32

  Vinod Kumar Mishra, B. T. Kumaon Institute of Technology, India

Chapter 4
Fuzzy Classification using Self-Adaptive Algorithm to Generate Membership Function ........................................................................................................................................... 47

  Hemant Jalota, Indian Institute of Technology Mandi, India
  Manoj Thakur, Indian Institute of Technology Mandi, India

Chapter 5
Deteriorating Inventory Model under Permissible Delay in Payments and Fuzzy Environment ........................................................................................................................................... 77

  Nita H. Shah, Gujarat University, India
  Sarla Pareek, Banasthali University, India
  Isha Sangal, Banasthali University, India
Chapter 6
A Possibility Approach for the Single Item Lot Sizing Problem with Fuzzy Parameters: Single Item Lot Sizing Problem................................................................. 100
Manoj Kumar, International Engineering Services, India
Jyoti Raman, International Engineering Services, India
Priya Singh, Nalanda International Engineering Services, India

Chapter 7
Modeling of an Inventory System with Variable Demands and Lead Times using a Fuzzy Approach.......................................................... 133
Vijay Kumar, Manav Rachna International University, India
Pravin Kumar, Delhi Technological University, India

Chapter 8
EPQ Inventory Models under mλ-Measure ........................................... 152
Hardik N. Soni, Chimnabhai Patel Post Graduate Institute of Computer Applications, India
Shivangi Suthar, Survey of India, India

Chapter 9
Some Studies in Multi-Storage Inventory System: Using Genetic Algorithm................................................................. 176
Shyamal Kumar Mondal, Vidyasagar University, India

Chapter 10
Optimization of Inventory for Optimal Replenishment Policies and Lead-Time with Time Varying Demand: A Genetic Algorithm Approach .......... 201
Kaushik Kumar, Birla Institute of Technology, India
Supriyo Roy, Birla Institute of Technology, India

Chapter 11
Inventory Control and Big Data................................................................. 222
Meghna Sharma, The NorthCap University, India
Niharika Garg, The NorthCap University, India

Chapter 12
Optimal Inventory Classification using Data Mining Techniques ............... 236
Reshu Agarwal, Banasthali University, India
Mandeep Mittal, Amity School of Engineering and Technology, India
Sarla Pareek, Banasthali University, India
Chapter 13
Customer Behavior Prediction using K-Means Clustering Algorithm ........... 256
Juhi Singh, Banasthali Vidyapith, India
Mandeep Mittal, Amity School of Engineering and Technology, India
Sarla Pareek, Banasthali Vidyapith, India

Chapter 14
Application of Simulation Techniques: Reducing the “Givens” and
“Approximations” in the Analysis of Stochastic Inventory Models............... 268
Ningombam Sanjib Meitei, Devi Ahilya University, India
Snigdha Banerjee, Devi Ahilya University, India

Chapter 15
Study of Industrial Model for Five-Input, Five-Stage Queueing Network ....... 300
Jitendra Kumar, Madhav Institute of Technology and Science, India
Vikas Shinde, Madhav Institute of Technology and Science, India

Chapter 16
A Gentle Introduction to the Bayesian Paradigm for Some Inventory
Models.............................................................................................................. 340
Vinti Dhaka, Banasthali University, India
Chandra K. Jaggi, University of Delhi, India
Sarla Pareek, Banasthali University, India
Piyush Kant Rai, Banasthali University, India

Compilation of References ................................................................................. 360

About the Contributors ....................................................................................... 398

Index.................................................................................................................... 404
