Table of Contents

Preface .................................................................................................................................................. xxiv

Section 1
Trends and Advances of Cloud-Based Teaching and Learning

Chapter 1
Strategic Planning for Cloud Computing Adoption in STEM Education: Finding Best Practice Solutions ........................................................................................................................................... 1
    Alan S. Weber, Weill Cornell Medical College in Qatar, Qatar

Chapter 2
Cloud Computing as a Catalyst for Change in STEM Education ...................................................... 12
    John P. Sahlin, Coleman University, USA
    Kim Lobera, Coleman University, USA

Chapter 3
The Emergence of Cloud Portfolio in Higher Education .................................................................... 31
    Pooja Gupta, Uttaranchal University, India

Section 2
Development of Education Cloud Platform

Chapter 4
Strategies and Practice of Cloud-Based Learning Environment Implementation ............................ 42
    Anwar Hossain Masud, Charles Sturt University, Australia
    Xiaodi Huang, Charles Sturt University, Australia

Chapter 5
Designing, Developing, and Evaluating a Cloud-Based Laboratory for Online STEM IT Students ....... 64
    Dongqing Yuan, University of Wisconsin – Stout, USA
    Brandon Cross, University of Wisconsin – Stout, USA

Chapter 6
Addressing Transport Layer Issues in Cloud Computing: A STEM Perspective .............................. 79
    Claudio Estevez, Universidad de Chile, Chile
Chapter 7
Cloud-Based Social Media as LMS: A Fit for STEM in Developing and Newly Developed Economies........................................................... 94
Matthew A. Eichler, Texas State University, USA
Las Johansen Balios Caluza, Leyte Normal University, Philippines

Chapter 8
A Cloud-Based Learning Platform: STEM Learning Experiences with New Tools............................. 106
Rocael Hernandez Rizzardini, Galileo University, Guatemala
Christian Gütl, Graz University of Technology, Austria & Curtin University, Australia

Chapter 9
Context-Aware Cloud Computing for Personal Learning Environment ............................................ 123
Feng Chen, De Montfort University, UK
Ali Al-Bayatti, De Montfort University, UK
Francois Siewe, De Montfort University, UK

Chapter 10
Free and Open Source Cloud Computing Technology ....................................................................... 141
Lee Chao, University of Houston – Victoria, USA

Section 3
Teaching and Learning in the Cloud Environment

Chapter 11
Cloud Computing for Teaching and Learning: Design Strategies ...................................................... 159
Bay Arinze, Drexel University, USA
Cheickna Sylla, New Jersey Institute of Technology, USA
Onuora Amobi, LearnAboutTheWeb.com, USA

Chapter 12
Engaging Students in Conducting Data Analysis: The Whole-Class Data Advantage....................... 172
Virginia Oberholzer Vandergon, California State University – Northridge, USA
John M. Reveles, California State University – Northridge, USA
Norman Herr, California State University – Northridge, USA
Dorothy Nguyen-Graf, California State University – Northridge, USA
Mike Rivas, California State University – Northridge, USA
Matthew d’Alessio, California State University – Northridge, USA
Brian Foley, California State University – Northridge, USA

Chapter 13
Hands-On Learning of Cloud Computing .......................................................................................... 198
Marta Beltrán, Universidad Rey Juan Carlos, Spain
<table>
<thead>

</tbody>
</table>
Chapter 21
Improving the Effectiveness of Research Supervision in STEM Education: Cloud-Based Multimedia Solutions

Tony Rickards, Curtin University, Australia

Chapter 22
Designing a Cloud-Based Assessment Model: A New Zealand Polytechnic Case Study

Tony Rickards, Curtin University, Australia
Aaron Steele, Universal College of Learning, New Zealand

Chapter 23
Cloud Services in UK Higher Education: A Feasibility Study for Providing IaaS in the Computing and Library Services of a UK University

Alexandros Chrysikos, University of Huddersfield, UK
James McDowell, University of Huddersfield, UK
Rupert Ward, University of Huddersfield, UK

Chapter 24
A Media Interpretation of the Negative Impact of Cloud Technologies

Michael S. Tang, University of Colorado – Denver, USA
Arunprakash T. Karunanithi, University of Colorado – Denver, USA

Chapter 25
The Significance of Situation Awareness in Education: Being Aware of What We Learn

Pio Alfredo Di Tore, Università degli Studi di Salerno, Italy
Felice Corona, Università degli Studi di Salerno, Italy
