Table of Contents

Preface .............................................................................................................................................. xxvi

Volume I

Section 1
Fundamental Concepts and Theories

This section serves as a foundation for this exhaustive reference tool by addressing underlying principles essential to the understanding of Special and Gifted Education. Chapters found within these pages provide an excellent framework in which to position Special and Gifted Education within the field of information science and technology. Insight regarding the critical incorporation of global measures into Special and Gifted Education is addressed, while crucial stumbling blocks of this field are explored. With 13 chapters comprising this foundational section, the reader can learn and choose from a compendium of expert research on the elemental theories underscoring the Special and Gifted Education discipline.

Chapter 1
Historical Overview of Adult Gifted Education in the United States ................................................. 1
   Judith Bazler, Monmouth University, USA
   Letitia Graybill, Monmouth University, USA
   Meta Van Sickle, College of Charleston, USA

Chapter 2
Using Bronfenbrenner’s Ecological Framework to Design Support Systems for Education and Special Education: Learning about Thought Systems ................................................................. 11
   Gabriela Walker, University of South Dakota, USA
   Elizabeth Pattison, Ashland University, USA

Chapter 3
Selecting Computer-Mediated Interventions to Support the Social and Emotional Development of Individuals with Autism Spectrum Disorder ................................................................. 32
   Kristen Gillespie-Lynch, City University of New York, USA
   Patricia J. Brooks, City University of New York, USA
   Christina Shane-Simpson, City University of New York, USA
   Naomi Love Gaggi, City University of New York, USA
   Deborah Sturm, City University of New York, USA
   Bertram O. Ploog, City University of New York, USA
Chapter 4
Avatars, Humanoids, and the Changing Landscape of Assessment and Intervention for Individuals with Disabilities across the Lifespan ................................................................. 59

Emily Hotez, City University of New York – Hunter College, USA

Chapter 5
Response to Intervention at the Secondary Education Level: An Overview ..................................... 86

Pam Epler, Grand Canyon University, USA

Chapter 6
Multiplayer Kinect Serious Games: A Review ........................................................................ 110

Ali Alshammari, Purdue University, USA
David Whittinghill, Purdue University, USA

Chapter 7
Nonverbal Learning Disorder: Past, Present, and Future ....................................................... 130

Joseph E. Casey, University of Windsor, Canada

Chapter 8
Type 1 Diabetes Mellitus in the Inclusive School Setting: Daily and Long Term Effects on Education .................................................................................................................. 169

Joseph Charles Hoffman, Stony Brook University, USA
Jennifer N. Osipoff, Stony Brook Children’s Hospital, USA

Chapter 9
Electronic Performance Support System (EPSS) Tools to Support Teachers and Students ........... 201

Katherine Mitchem, California University of Pennsylvania, USA
Gail Fitzgerald, University of Missouri, USA
Kevin Koury, California University of Pennsylvania, USA

Chapter 10
Extended Assistive Technology: The Impact of Interactivity of Human-Computer Interfaces on Independence, Employment, and Organizations ...................................................... 223

Ben Tran, Alliant International University, USA

Chapter 11
Removing the Disability from Distance Education ...................................................................... 254

Christina Yuknis, Gallaudet University, USA

Chapter 12
Using iPads and Mobile Technology for Children with Developmental Disabilities: Facilitating Language and Literacy Development ................................................................. 268

Lisa A. Proctor, Missouri State University, USA
Ye Wang, Teachers College, Columbia University, USA
Chapter 13
Living with ADHD: Timing Perceptions and Their Applicability to the Experience of ADHD ....... 302
Osnat O. Fellus, University of Ottawa, Canada
Daniel P. Fellus, Carleton University, Canada

Section 2
Development and Design Methodologies

This section provides in-depth coverage of conceptual architecture frameworks to provide the reader with a comprehensive understanding of the emerging developments within the field of Special and Gifted Education. Research fundamentals imperative to the understanding of developmental processes within Special and Gifted Education are offered. From broad examinations to specific discussions on methodology, the research found within this section spans the discipline while offering detailed, specific discussions. From basic designs to abstract development, these chapters serve to expand the reaches of development and design technologies within the Special and Gifted Education community. This section includes 17 contributions from researchers throughout the world on the topic of Special and Gifted Education.

Chapter 14
Evolution of a Course for Special Education Teachers on Integrating Technology into Math and Science ........................................................................................................................................323
Irina Lyublinskaya, College of Staten Island, USA

Chapter 15
The SOAR Strategies for Online Academic Research: Helping Middle School Students Meet New Standards ........................................................................................................................................351
Carolyn Harper Knox, University of Oregon, USA
Lynne Anderson-Inman, University of Oregon, USA
Fatima Terrazas-Arellanes, University of Oregon, USA
Emily Deanne Walden, University of Oregon, USA
Bridget Hildreth, University of Oregon, USA

Chapter 16
Design and Development of a Multi-Agent E-Learning System ................................................................. 390
Terje Kristensen, Bergen University College, Norway
Marius Dyngeland, Bergen University College, Norway

Chapter 17
Realabilities: The Development of a Research-Based Children’s Television Program to Address Disability Awareness and a Stop-Bullying Platform in the Schools .................................................. 448
Nava R. Silton, Marymount Manhattan College, USA
Senada Arucevic, Marymount Manhattan College, USA
Rebecca Ruchlin, Marymount Manhattan College, USA
Vanessa Norkus, Marymount Manhattan College, USA
Chapter 18
Using Technology and Community Partnerships to Improve Educator Preparation: Changing the Landscape for Individuals with Autism Spectrum Disorder

Kristin S. Lierheimer, Bowling Green State University, USA
Mary M. Murray, Bowling Green State University, USA
Deborah G. Wooldridge, Bowling Green State University, USA
Sheila Smith, Ohio Center for Autism and Low Incidence, USA

Chapter 19
The Effects of Using Dynabook to Prepare Special Education Teachers to Teach Proportional Reasoning

Susan Courrey, San Francisco State University, USA
Pamela LePage, San Francisco State University, USA
Jose Blackorby, SRI International, USA
Jody Siker, San Francisco State University, USA
Trang Nguyen, Community Gatepath, USA

Chapter 20
Imagining Social Equity

Helen J. Farrell, The University of Melbourne, Australia

Chapter 21
Camera-Based Motion Tracking and Performing Arts for Persons with Motor Disabilities and Autism

Alexandros Kontogeorgakopoulos, Cardiff Metropolitan University, UK
Robert Wechsler, MotionComposer, Germany
Wendy Keay-Bright, Cardiff Metropolitan University, UK

Chapter 22
The Role of Technology in Providing Effective Gifted Education Services in Clustered Classrooms

Geri Collins, Mercer University, USA
Jeffrey Hall, Mercer University, USA
Bridget Taylor, Mercer University, USA

Chapter 23
English Language Learners and the Response to Intervention Model

Melissa Christine Higgins, San Francisco State University, USA & Gateway Middle School, USA

Chapter 24
Distance Learning for Students with Special Needs through 3D Virtual Learning

James M. Laffey, University of Missouri, USA
Janine Stichter, University of Missouri, USA
Krista Galyen, University of Missouri, USA
Chapter 25
The Learning Style-Based Adaptive Learning System Architecture .................................................. 608
Chyun-Chyi Chen, National Cheng Kung University, Taiwan
Po-Sheng Chiu, National Cheng Kung University, Taiwan
Yueh-Min Huang, National Cheng Kung University, Taiwan

Volume II

Chapter 26
Ontology-Based Adaptive Dynamic E-Learning Map Planning Method for Conceptual Knowledge Learning ........................................................................................................................... 619
Tsung-Yi Chen, Nanhua University, Taiwan
Hui-Chuan Chu, National University of Tainan, Taiwan
Yuh-Min Chen, National Cheng Kung University, Taiwan
Kuan-Chun Su, National Cheng Kung University, Taiwan

Chapter 27
Using Second Life® for Situated and Active Learning in Teacher Education ................................. 641
Barbara L. Ludlow, West Virginia University, USA
Melissa D. Hartley, West Virginia University, USA

Chapter 28
Improving Students’ Academic Learning by Helping Them Access Text .............................................. 667
Michael Ben-Avie, SCSU Center of Excellence on Autism Spectrum Disorders, USA
Régine Randall, Southern Connecticut State University, USA
Diane Weaver Dunne, Connecticut Radio Information System, USA
Chris Kelly, Connecticut Radio Information System, USA

Chapter 29
RTI and Reading at the Secondary Level .............................................................................................. 687
Carol Hall, University of Phoenix, USA
Jamie Mahoney, Murray State University, USA

Chapter 30
Differentiating through Technology for Gifted Students ............................................................. 711
Debra R. Sprague, George Mason University, USA
Beverly Shaklee, George Mason University, USA

Section 3
Tools and Technologies
This section presents an extensive coverage of various tools and technologies available in the field of Special and Gifted Education that practitioners and academicians alike can utilize to develop different techniques. These chapters enlighten readers about fundamental research on the many tools facilitating the burgeoning field of Special and Gifted Education. It is through these rigorously researched chapters that the reader is provided with countless examples of the up-and-coming tools and technologies emerging from the field of Special and Gifted Education. With 15 chapters, this section offers a broad treatment of some of the many tools and technologies within the Special and Gifted Education field.
Chapter 31
Using Mobile Technology for Student Teaching Observations of Special Education Candidates..... 726
Josh Harrower, California State University – Monterey Bay, USA
Cathi Draper Rodríguez, California State University – Monterey Bay, USA

Chapter 32
The Promise and Limitations of Assistive Technology Use among Children with Autism .......... 740
Kari Andersen, Fordham University, USA
Lauren Levenson, Fordham University, USA
Fran C. Blumberg, Fordham University, USA

Chapter 33
Video Modeling for Individuals with Autism Spectrum Disorders.................................................... 760
Christine R. Ogilvie, University of West Florida, USA
Peggy Whitby, University of Arkansas, USA

Chapter 34
An Affective Computer-Mediated Learning for Persons with Motor Impairments...................... 779
Nia Valeria, Swinburne University of Technology, Malaysia
Lau Bee Theng, Swinburne University of Technology, Malaysia

Chapter 35
Using Technology to Support Social Competence .......................................................... 826
Brenda Smith Myles, Ohio Center for Autism and Low Incidence, USA
Jan Rogers, Ohio Center for Autism and Low Incidence, USA
Amy Bixler Coffin, Ohio Center for Autism and Low Incidence, USA
Wendy Szakacs, Ohio Center for Autism and Low Incidence, USA
Theresa Earles-Vollrath, University of Central Missouri, USA

Chapter 36
iPods and iPads as AAC Devices for Children with Developmental Disorders ......................... 846
Larah van der Meer, Victoria University of Wellington, New Zealand

Chapter 37
Supporting Communication between People with Social Orientation Impairments Using Affective Computing Technologies: Rethinking the Autism Spectrum ......................................................... 873
Jonathan Bishop, The European Parliament, Belgium

Chapter 38
The Use of Computer-Based Technologies to Increase the Academic, Behavioral, and Social Outcomes of Students with Autism Spectrum Disorders in Schools: Considerations for Best Approaches in Educational Practice ................................................................. 887
Frank J. Sansosti, Kent State University, USA
Mary Lynn Mizenko, Kent State University, USA
Allison Krupko, Kent State University, USA
Chapter 39
Robots and Autism Spectrum Disorder: Clinical and Educational Applications ......................... 905
Amie Senland, Fordham University, USA

Chapter 40
Technology-Assisted Learning for Students with Moderate and Severe Developmental Disabilities ................................................................. 925
Diane M. Browder, University of North Carolina at Charlotte, USA
Alicia Saunders, University of North Carolina at Charlotte, USA
Jenny Root, University of North Carolina at Charlotte, USA

Chapter 41
Robotics for Assisting Children with Physical and Cognitive Disabilities ........................................... 953
Mark Tee Kit Tsun, Swinburne University of Technology, Malaysia
Lau Bee Theng, Swinburne University of Technology, Malaysia
Hudiyaya Siswoyo Jo, Swinburne University of Technology, Malaysia
Patrick Then Hang Hui, Swinburne University of Technology, Malaysia

Chapter 42
Assistive Technologies at the Edge of Language and Speech Science for Children with Communication Disorders: VocalIDTM, Free SpeechTM, and SmartPalateTM ........................................... 996
Joséphine Anne Genèvieve Ancelle, Teachers College Columbia University, USA

Chapter 43
Telehealth Technology and Pediatric Feeding Disorders ................................................................. 1020
Taylor A. Luke, University of Texas – Austin, USA
Rebecca R. Ruchlin, Monmouth University, USA

Chapter 44
The Use of Mobile Technologies for Students At-Risk or Identified with Behavioral Disorders within School-Based Contexts ................................................................. 1034
Frank J. Sansosti, Kent State University, USA
Peña L. Bedesem, Kent State University, USA

Chapter 45
Video Use in Teacher Education: Transition from a Teaching Tool to an Assessment Tool .......... 1048
Ashley Hodge, Duquesne University, USA
David D. Carbonara, Duquesne University, USA

Section 4
Utilization and Application

This section discusses a variety of applications and opportunities available that can be considered by practitioners in developing viable and effective Special and Gifted Education programs and processes. This section includes 18 chapters that review topics from case studies to best practices and ongoing research. Further chapters discuss Special and Gifted Education in a variety of settings. Contributions included in this section provide excellent coverage of today’s IT community and how research into Special and Gifted Education is impacting the social fabric of our present-day global village.
Chapter 46
Incorporating Mobile Technology into Evidence-Based Practices for Students with Autism .......... 1069

Iva Strnadová, University of New South Wales, Australia
Therese M. Cumming, University of New South Wales, Australia
Cathi Draper Rodríguez, California State University – Monterey Bay, USA

Chapter 47
Integrating Virtual Worlds and Mobile Robots in Game-Based Treatment for Children with Intellectual Disability ................................................................. 1088

Franca Garzotto, Politecnico di Milano, Italy
Mirko Gelsomini, Politecnico di Milano, Italy

Chapter 48
A Collective Case Study on Two Speech and Language Impaired Learners with Autism: The Instructional Implications of a Hybrid Applied Behavior Analysis (ABA) and iPad App-Infused Model ............................................................. 1104

Jacqueline R. Sabale, Tenafly Public School District, USA, Rutherford Public School District, USA & William Paterson University, USA

Chapter 49
Web-Based Social Stories and Games for Children with Autism .................................................. 1143

Kanisorn Jeekratok, King Mongkut’s University of Technology, Thailand
Sumalee Chanchalor, King Mongkut’s University of Technology, Thailand
Elizabeth Murphy, Memorial University of Newfoundland, Canada

Chapter 50
Reading and Writing Strategies: Tools for Active Engagement in the College Classroom .......... 1162

Tanya Sturtz, Keene State College, USA
Darrell Hucks, Keene State College, USA

Chapter 51
Gifted Education and One Case Solution through E-Learning in Japan .................................... 1176

Masahiro Nagai, Tokyo Metropolitan University, Japan
Noriyuki Matsunami, Nishi-Tokyo Shi Sakae Elementary School, Japan

Chapter 52
Dissemination of Assistive Technology Devices for Children with Disabilities through Realabilities .................................................................................................................. 1201

Senada Arucevic, Long Island University – Brooklyn, USA

Volume III

Chapter 53
iPad Implementation Approaches in K-12 School Environments ............................................. 1228

Heejung An, William Paterson University, USA
Sandra Alon, William Paterson University, USA
David Fuentes, William Paterson University, USA
Chapter 54
The Case for Universal Design for Learning in Technology Enhanced Environments .................... 1241
  Stuart Peter Dinmore, University of South Australia, Australia

Chapter 55
Multimodal Composition for Teacher Candidates: Models for K-12 Classroom Writing
Instruction ........................................................................................................................................ 1252
  Dana L. Grisham, National University, USA
  Linda Smetana, CSU East Bay, USA

Chapter 56
Mobile Games Individualise and Motivate Rehabilitation in Different User Groups ..................... 1273
  Antti Koivisto, Satakunta University of Applied Sciences, Finland
  Sari Merilampi, Satakunta University of Applied Sciences, Finland
  Andrew Sirkka, Satakunta University of Applied Sciences, Finland

Chapter 57
Helping Struggling Writers: Assistive Technology as Part of Intervention Programming ............ 1288
  Michael Dunn, Washington State University – Vancouver, USA

Chapter 58
Leveled Literacy Intervention: An Elementary Reading Intervention for English Language
Learner Newcomers .......................................................................................................................... 1302
  Kelli Campbell, Rossville Middle School, USA

Chapter 59
Implementing a Problem-Based Technology Learning Environment to Foster Cultural Literacy
and Responsiveness Instructional Skills .......................................................................................... 1324
  Blanche Jackson Glimps, Tennessee State University, USA
  Theron Ford, John Carroll University, USA

Chapter 60
Zagreb Case: Improvement of Social Infrastructure ................................................................. 1338
  Silvana Tomic Rotim, ZIH, Croatia
  Elizabeta Knorr, The City of Zagreb, Croatia

Chapter 61
Case Studies ...................................................................................................................................... 1350
  Barbara Rissman, Queensland University of Technology, Australia

Chapter 62
Implementing iPad and Mobile Technologies for Students with Intellectual Disabilities ............ 1408
  Cathi Draper Rodríguez, California State University – Monterey Bay, USA
  Iva Strnadová, University of New South Wales, Australia
  Therese M. Cumming, University of New South Wales, Australia
Chapter 63
Using Technology to Teach Gifted Students in a Heterogeneous Classroom ........................................ 1426
Edward L. Shaw Jr., University of South Alabama, USA
Rebecca M. Giles, University of South Alabama, USA

Section 5
Organizational and Social Implications

This section includes a wide range of research pertaining to the social and behavioral impact of Special and Gifted Education around the world. Chapters introducing this section critically analyze and discuss trends in Special and Gifted Education. Also investigating a concern within the field of Special and Gifted Education is research which discusses the effect of user behavior on Special and Gifted Education. With 12 chapters, the discussions presented in this section offer research into the integration of global Special and Gifted Education as well as implementation of ethical and workflow considerations for all organizations.

Chapter 64
Pathway to Independence: Past, Present, and Beyond via Robotics .......................................................... 1444
Kavita Krishnaswamy, University of Maryland, USA
Tim Oates, University of Maryland, USA

Chapter 65
Parents as Advocates for Children with IBD at School .............................................................................. 1493
Maria Gordon, Voyageur Memorial Elementary School, Canada

Chapter 66
Applied Behavior Analysis and Autism: A Latin American Case ............................................................... 1506
Mapy Chavez Askins, Alcanzando, Inc., USA

Chapter 67
Analysis of 3D Corpus Callosum Images in the Brains of Autistic Individuals ..................................... 1529
Ahmed Elnakib, University of Louisville, USA & Masnoura University, Egypt
Manuel F. Casanova, University of Louisville, USA
Ahmed Soliman, University of Louisville, USA
Georgy Gimel’farb, The University of Auckland, New Zealand
Ayman El-Baz, University of Louisville, USA

Chapter 68
Nonverbal Learning Disabilities and Asperger Syndrome in Young Adults: Vocabulary, Gestalts, and Social Perception ........................................................................................................ 1555
M. E. Stothers, The University of Western Ontario, Canada
J. Oram Cardy, The University of Western Ontario, Canada

Chapter 69
Nonverbal Learning Disability (NLD): Unraveling the Mystery .............................................................. 1606
Barbara Rissman, Queensland University of Technology, Australia
Chapter 70
Social Skills Development for Children with Autism Spectrum Disorders through the Use of Interactive Storytelling Games ........................................................................................................ 1631
  Sukun Jin, Konkuk University, South Korea
  Boaventura DaCosta, Solers Research Group, USA
  Soohnwa Seok, Korea University, South Korea

Chapter 71
The Road to Diagnosis and Post-School Life ........................................................................................................ 1648
  Barbara Rissman, Queensland University of Technology, Australia

Chapter 72
Facilitating Learning Resource Retrieval for Students with Disabilities through an Ontology-Driven and Disability-Aware Virtual Learning Environment........................................................................ 1668
  Julius T. Nganji, University of Ottawa, Canada
  Mike Brayshaw, University of Hull, UK

Chapter 73
Using Video Gameplay to Measure Achievement for Students with Disabilities: A New Perspective to Grading and Achievement Reporting ........................................................................................................ 1689
  Benjamin Gallegos, University of Central Florida, USA
  Michelle T. Kepple, University of Central Florida, USA
  Caitlyn A. Bukaty, University of Central Florida, USA

Chapter 74
Social Skills in Individuals with Nonverbal Learning Disabilities.............................................................. 1718
  Lisa Marchinkoski, Green Mountain Speech, Language, and Learning, USA

Chapter 75
A Second Chance: Delinquency Prevention among Special Education Students........................................... 1741
  Christine S. Barrow, Molloy College, USA

Section 6
Managerial Impact

The 11 chapters within this section present contemporary coverage of the social implications of Special and Gifted Education, more specifically related to the corporate and managerial utilization of information sharing technologies and applications, and how these technologies can be extrapolated to be used in Special and Gifted Education. Equally as crucial, chapters within this section discuss how leaders can utilize Special and Gifted Education applications to get the best outcomes from their governors and their citizens.

Chapter 76
Public Administrators, School Safety, and Forms of Surveillance: Ethics and Social Justice in the Surveillance of Students’ Disabilities .................................................................................. 1760
  Kirsten Loutzenhiser, Troy University, USA
### Chapter 77
French Immersion “So Why Would You Do Something Like That to a Child?”: Issues of Advocacy, Accessibility, and Inclusion  
Renée Christine Bourgoin, University of New Brunswick, Canada

### Chapter 78
Special Collaboration: Establishing Successful Partnerships between School Librarians and Special Educators
Stephanie A. Jones, Georgia Southern University, USA  
Kathi Vanderbilt, Cobb County School District, USA  
Kelly Bramblett, Cobb County School District, USA

### Chapter 79
Addressing Executive Function Using Assistive Technology to Increase Access to the 21st Century Skills  
Brenda Smith Myles, Ohio Center for Autism and Low Incidence, USA  
Jan Rogers, Ohio Center for Autism and Low Incidence, USA

### Volume IV

#### Chapter 80
Case Studies of Chronically Ill Children: Implications for Education Professionals  
Thomas C. Gibbon, Shippensburg University, USA  
Christopher L. Schwilk, Shippensburg University, USA  
Jenifer Cline, Great Falls School District, USA  
Kimberly Matthews, Independent Researcher, USA  
Katie Sweigart, Shippensburg University, USA  
Emily Ferguson, Independent Researcher, USA  
David F. Bateman, Shippensburg University, USA

#### Chapter 81
AsTeRICS: A Framework for Including Sensor Technology into AT Solutions for People with Motor Disabilities  
Klaus Miesenberger, University of Linz, Austria  
Gerhard Nussbaum, Kompetenznetzwerk KI-I, Austria  
Roland Ossmann, Kompetenznetzwerk KI-I, Austria

#### Chapter 82
Perceptions of Teacher Candidates’ Experiences in Paired Placements: Perceptions of Paired Placements  
Jeanine B. Jechura, Bowling Green State University, USA  
Cynthia Diane Bertelsen, Bowling Green State University, USA

#### Chapter 83
Implementing Secondary RTI Models: Leadership Challenges (and Some Solutions)  
Susan G. Porter, University of Redlands, USA
Chapter 84
edTPA Preparation: Building Support Structures for Teacher Candidates ........................................ 1938
   Randa Suleiman, Cardinal Stritch University, USA
   Clavon Byrd, Cardinal Stritch University, USA

Chapter 85
A Tangled Knot of Career and Credential: The Associate in Applied Science Degree as Career Preparation and Transfer Catalyst ........................................................................................................ 1966
   Andrew J. Ryder, University of North Carolina Wilmington, USA
   Bethany D. Meighen, University of North Carolina Wilmington, USA
   Jaime L. Russell, University of North Carolina Wilmington, USA
   Crystal E. Hollenbaugh, University of North Carolina Wilmington, USA
   John E. Lothes II, University of North Carolina Wilmington, USA
   Ezekiel W. Kimball, University of Massachusetts Amherst, USA

Chapter 86
Creating Protective Barriers for Students with Disabilities in E-Learning Environments ............... 1997
   Bob Barrett, American Public University, USA

Section 7
Critical Issues

This section contains 10 chapters, giving a wide variety of perspectives on Special and Gifted Education and its implications. Within the chapters, the reader is presented with an in-depth analysis of the most current and relevant issues within this growing field of study. Crucial questions are addressed and alternatives offered along with theoretical approaches discussed.

Chapter 87
Improving Socialization and Emotion Recognition for Children with Autism Using a Smartphone App ........................................................................................................................................ 2010
   Cassidy Lamm, University of Alabama, USA
   Lauren Lambert, University of Alabama, USA
   Joshua Wolfe, University of Alabama, USA
   Jeff Gray, University of Alabama, USA
   Angela Barber, University of Alabama, USA
   Gary Edwards, United Cerebral Palsy of Greater Birmingham, USA

Chapter 88
The Impact of ICT in Educating Students with Learning Disabilities in Australian Schools: An ANT Approach ........................................................................................................................................ 2028
   Tas Adam, Independent Researcher, Australia
   Arthur Tatnall, Victoria University, Australia

Chapter 89
Applied or Denied? The eLearning Experience of an Autistic, Mature-Aged University Student ........................................................................................................................................ 2042
   Jillian Downing, University of Tasmania, Australia
Chapter 90
Critical Behavior Monitoring for Children with Special Needs in Preventing Physical Injury
Using Kinect .......................................................................................................................... 2059
  Ong Chin Ann, Swinburne University of Technology, Malaysia
  Lau Bee Theng, Swinburne University of Technology, Malaysia
  Henry Lee Seldon, Multimedia University Malaysia, Malaysia
  Fernando Anddie Putra, Swinburne University of Technology, Malaysia

Chapter 91
The Modern Problem of Psychological and Pedagogical Foundations of Russian E-Learning
Systems: The Possible Solutions and the Future Challenges of Psychology and Pedagogy .......... 2100
  Bronyus Aysmontas, Moscow City State University of Psychology and Education, Russia
  Md. Akther Uddin, Moscow City State University of Psychology and Education, Russia

Chapter 92
Does Mobile Technology Have a Place in Differentiated Instruction?........................................ 2119
  Therese M. Cumming, University of New South Wales, Australia

Chapter 93
Response to Intervention in Middle and High School Mathematics ........................................... 2138
  Lynn Gannon Patterson, Murray State University, USA
  Meagan Musselman, Murray State University, USA

Chapter 94
Evaluation of Mathematical Cognitive Functions with the Use of EEG Brain Imaging............... 2165
  Antonia Plerou, Ionian University, Greece
  Panayiotis Vlamos, Ionian University, Greece

Chapter 95
Mixed-Reality Immersive Environment as an Instructional Tool for Building Educational
Leadership Capacity: Is This the Future? ............................................................................. 2187
  Valerie Anne Storey, University of Central Florida, USA
  Neffisatu J. C. Dambo, University of Central Florida, USA

Chapter 96
Evaluating a Technique for Improving Letter Memory in At-Risk Kindergarten Students........... 2214
  Carol Stockdale, ARK Institute of Learning, USA

Section 8
Emerging Trends

This section highlights research potential within the field of Special and Gifted Education while exploring uncharted areas of study for the advancement of the discipline. Introducing this section are chapters that set the stage for future research directions and topical suggestions for continued debate, centering on the new venues and forums for discussion. A pair of chapters on space-time makes up the middle of the section of the final 11 chapters, and the book concludes with a look ahead into the future of the Special and Gifted Education field. In all, this text will serve as a vital resource to practitioners and academics interested in the best practices and applications of the burgeoning field of Special and Gifted Education.
Chapter 97
Recent Advances in Augmentative and Alternative Communication: The Advantages and Challenges of Technology Applications for Communicative Purposes .......................................................... 2236
   Toby B. Mehl-Schneider, City University of New York, USA

Chapter 98
I Stand with Henry: A Case Study of An Advocacy Organization’s Use of Social Media – How a Grassroots Organization Can Have a Voice in a Large Public Bureaucracy ................................................. 2249
   Kirsten Loutzenhiser, Troy University, USA
   Robert Cropf, Saint Louis University, USA

Chapter 99
A Task Assistant for Individuals with Autism Spectrum Disorder .................................................. 2261
   Joo Tan, Kutztown University, USA

Chapter 100
Video Modeling for Learners with Developmental Disabilities ......................................................... 2276
   Peggy J. S. Whitby, University of Arkansas, USA
   Christine R. Ogilvie, FSU CARD, USA
   Krista Vince Garland, SUNY Buffalo State, USA

Chapter 101
Dance and Movement as Therapy for Children with Autism Spectrum Disorders (ASD): A Case for Kuching, Sarawak ............................................................................................................. 2294
   Jane Teo, British Ballet Organization, Malaysia
   Ong Puay Hoon, Universiti Malaysia Sarawak, Malaysia

Chapter 102
A Proposal for Multidisciplinary Software for People with Autism .................................................. 2306
   Eraldo Guerra, Center of Advanced Studies and Systems of Recife, Brazil
   Felipe Furtado, Federal University of Pernambuco (UFPE), Brazil

Chapter 103
Text-to-Speech Software as Assistive and Mainstream Technology: Transitioning from a Functional to a Socio-Constructivist Approach ................................................................. 2332
   Fiona S. Baker, Emirates College for Advanced Education, UAE

Chapter 104
Social Media in Higher Education: Using Wiki for Online Gifted Education Courses ............... 2351
   Kristy Kowalske Wagner, University of Georgia, USA
   Sharon Dole, Western Carolina University, USA

Chapter 105
Music and Developmental Disabilities .......................................................................................... 2374
   Michelle Renee Blumstein, Marymount Manhattan College, USA
Chapter 106
School Activities with New Dot Code Handling Multimedia ......................................................... 2392
Shigeru Ikuta, Otsuma Women’s University, Japan
Diane Morton, University of Saint Joseph, USA
Mikiko Kasai, Hirosaki University, Japan
Fumio Nemoto, University of Tsukuba, Japan
Masaki Ohtaka, Takashima Special Needs Education School, Japan
Mieko Horiguchi, Otsuma Women’s University, Japan

Chapter 107
Mobile Technology and Differentiated Learning: Meeting the Needs of Students with Significant Disabilities .................................................................................................................. 2414
Ann C. Orr, Eastern Michigan University, USA
John F. Conley, Eastern Michigan University, USA

Index.................................................................................................................................................. xxix
