# Table of Contents

Preface ........................................................................................................................................... xviii  

Acknowledgment ........................................................................................................................... xxii  

Chapter 1  
CNT as a Sensor Platform ........................................................................................................... 1  
   Amir Fathi, Urmia University, Iran  
   Mina Hassanzadazar, Urmia University, Iran  

Chapter 2  
Modeling Trilayer Graphene-Based DET Characteristics for a Nanoscale Sensor .................. 19  
   Meisam Rahmani, Universiti Teknologi Malaysia, Malaysia  
   Hediyeh Karimi, Swinburne University of Technology, Australia  
   Mohammad Javad Kiani, Islamic Azad University, Iran  
   Ali Hosseingholi Poursal, Universiti Teknologi Malaysia, Malaysia  
   Komeil Rahmani, Islamic Azad University, Iran  
   Mohammad Taghi Ahmadi, Universiti Teknologi Malaysia, Malaysia & Urmia University, Iran  
   Razali Ismail, Universiti Teknologi Malaysia, Malaysia  

Chapter 3  
Silicene Nanoribbons and Nanopores for Nanoelectronic Devices and Applications .............. 39  
   Hatef Sadeghi, Lancaster University, UK  
   Sara Sangtarash, Lancaster University, UK  

Chapter 4  
GAS Sensor Modelling and Simulation ....................................................................................... 70  
   Elnaz Akbari, Universiti Teknologi Malaysia, Malaysia  
   Zolkafle Buntat, Universiti Teknologi Malaysia, Malaysia  
   Mohammad Taghi Ahmadi, Universiti Teknologi Malaysia, Malaysia  
   Hediyeh Karimi, Universiti Teknologi Malaysia, Malaysia  
   Mohsen Khaledian, Universiti Teknologi Malaysia, Malaysia
Chapter 5
Graphene-Based Gas Sensor Theoretical Framework ................................................................. 117
Elnaz Akbari, Universiti Teknologi Malaysia, Malaysia
Aria Enzevaee, Universiti Teknologi Malaysia, Malaysia
Hediyeh Karimi, Universiti Teknologi Malaysia, Malaysia
Mohammad Taghi Ahmadi, Universiti Teknologi Malaysia, Malaysia
Zolkafle Buntat, Universiti Teknologi Malaysia, Malaysia

Chapter 6
Chemiresistive Gas Sensors Based on Conducting Polymers.................................................. 150
Sajad Pirsa, Urmia University, Iran

Chapter 7
Modeling, Design, and Applications of the Gas Sensors Based on Graphene and Carbon
Nanotubes.................................................................................................................................................. 181
Rafael Vargas-Bernal, Instituto Tecnológico Superior de Irapuato, Mexico

Chapter 8
Development of Gas Sensor Model for Detection of NO2 Molecules Adsorbed on Defect-Free
and Defective Graphene .......................................................................................................................... 208
Meisam Rahmani, Universiti Teknologi Malaysia, Malaysia
Komeil Rahmani, Islamic Azad University, Iran
Mohammad Javad Kiani, Islamic Azad University, Iran
Hediyeh Karimi, Swinburne University of Technology, Australia
Elnaz Akbari, Universiti Teknologi Malaysia, Malaysia
Mohammad Taghi Ahmadi, Universiti Teknologi Malaysia, Malaysia
Razali Ismail, Universiti Teknologi Malaysia, Malaysia

Chapter 9
Modeling of Sensing Layer of Surface Acoustic-Wave-Based Gas Sensors ............................... 224
Hediyeh Karimi, Universiti Teknologi Malaysia, Malaysia
Rasoul Rahmani, Swinburne University of Technology, Australia
Elnaz Akbari, Universiti Teknologi Malaysia, Malaysia
Ali Cheloee Darabi, Iran University Science and Technology, Iran
Meisam Rahmani, Universiti Teknologi Malaysia, Malaysia
Mohammad Taghi Ahmadi, Universiti Teknologi Malaysia, Malaysia
Saba Anbari, Universiti Teknologi Malaysia, Malaysia

Chapter 10
Optimization of Current-Voltage Characteristics of Graphene-Based Biosensors ........................ 244
Hediyeh Karimi, Universiti Teknologi Malaysia, Malaysia
Rasoul Rahmani, Swinburne University of Technology, Australia
Elnaz Akbari, Universiti Teknologi Malaysia, Malaysia
Meisam Rahmani, Universiti Teknologi Malaysia, Malaysia
Mohammad Taghi Ahmadi, Universiti Teknologi Malaysia, Malaysia
Chapter 11
Graphene Based-Biosensor: Graphene Based Electrolyte Gated Graphene Field Effect Transistor

Mohammad Javad Kiani, Islamic Azad University, Iran
M. H. Shahrokh Abadi, Hakim Sabzevari University, Iran
Meisam Rahmani, Universiti Teknologi Malaysia, Malaysia
Mohammad Taghi Ahmadi, Urmia University, Iran
F. K. Che Harun, Universiti Teknologi Malaysia, Malaysia
Karamollah Bagherifard, Islamic Azad University, Iran

Chapter 12
Graphene and CNT Field Effect Transistors Based Biosensor Models

Ali Hosseingholi Pourasl, Universiti Teknologi Malaysia, Malaysia
Mohammad Taghi Ahmadi, Urmia University, Iran
Meisam Rahmani, Universiti Teknologi Malaysia, Malaysia
Razali Ismail, Universiti Teknologi Malaysia, Malaysia
Michae Loong Pengl Tan, Universiti Teknologi Malaysia, Malaysia

Chapter 13
Carbon Materials Based Ion Sensitive Field Effect Transistor (ISFET): The Emerging Potentials of Nanostructured Carbon-Based ISFET with High Sensitivity

Mohammad Javad Kiani, Islamic Azad University, Iran
M. H. Shahrokh Abadi, Hakim Sabzevari University, Iran
Meisam Rahmani, Universiti Teknologi Malaysia, Malaysia
M. T. Ahmadi, Urmia University, Iran
F. K. Che Harun, Universiti Teknologi Malaysia, Malaysia
S.N. Hedayat, Urmia University, Iran
S.H. Yaghoobian, Islamic Azad University, Iran

Chapter 14
Surface Plasmon Resonance-Based Sensor Modeling

Bahar Meshginqalam, Urmia University, Iran
Mohammad Taghi Ahmadi, Urmia University, Iran
Hamid Toloue Ajili Tousi, Malaysia-Japan International Institute of Technology (MJIIT), Malaysia
Arash Sabatyan, Urmia University, Iran
Anthony Centeno, Malaysia-Japan International Institute of Technology (MJIIT), Malaysia

Chapter 15
Fast Neuron Detection

Hadi Kasani, University of Mohaghegh Ardabili, Iran
Mohammad Taghi Ahmadi, Urmia University, Iran
Rasoul Khoda-Baksh, Urmia University, Iran
Dariush Rezaei Ochbelagh, Amirkabir University of Technology, Iran
Chapter 16
Sensors and Amplifiers: Sensor Output Signal Amplification Systems ........................................ 423
   Amir Fathi, Urmia University, Iran
   Sarkis Azizian, K. N. Toosi University of Technology, Iran
   Nastaran Sharifan, Tehran University, Iran

Chapter 17
Wireless Nanosensor Networks: Prospects and Challenges ............................................................. 505
   Sohail Anwar, Penn State University, USA

Compilation of References ........................................................................................................... 512

About the Contributors .................................................................................................................. 572
