The editors would like to acknowledge the help of all the people involved in the development of this book and, more specifically, to the authors and reviewers that took part in the review process. Without their support, this book would not have been completed.

We would like to thank each one of the authors for their contributions. Our sincere gratitude goes to the chapter authors who contributed their insights, expertise and time to this book. We have 12 chapters contributed by IBM Distinguish Engineers (DE), Senior Technical Staff Members (STSM) and senior cloud technical leaders from IBM U.S., Europe, India, Australia and Singapore. Sincere thanks to them for bringing the real world cloud experience and the best industrial practice to our audience. We have 6 chapters contributed by the global researchers from different universities and organizations, sincere thanks to them for bringing the leading edge research results to us.

We wish to acknowledge the valuable contributions of the reviewers regarding the improvement of quality, coherence, and content of chapters.

In particular, we are indebted to Rhonda Childress (IBM Fellow and CTO of Security Service) and George Africa (IBM Australia Solutioning Executive Leader and Executive IT Architect), for their contribution in writing Forewords for this book. They are well known global cloud business and technology leaders that design and deliver cloud platforms and services for the enterprises.

Last, we would like to thank our families for their love, patience and support throughout the realization of this book.
