The editors would like to acknowledge the help of all the people involved in this project and, more specifically, to the authors, reviewers and editorial advisory board that took part in the review process. Without their support, this book would not have become a reality.

First, the editors would like to thank each one of the authors for their contributions which significantly improved the quality of the book. Our sincere gratitude goes to the authors of the chapters who contributed their time and expertise to this book.

Second, the editors wish to acknowledge the valuable contributions of the reviewers regarding the improvement of quality, coherence, and content presentation of chapters. Most of the authors also served as referees; we highly appreciate their double task. The contribution of the editorial advisory board constituted an important help.

The editors want to express also their gratitude to Prof. Dr. Xiaodi Hao for his commitment in the elaboration of the preface of this book.

To finish, the editors want to acknowledge the Cost Action Water2020 for providing the contact network to identify the authors of some of the elaborated chapters.
