| Chapter 1 | Effective Optimization of Statistical Decisions for Age Replacement Problems under Parametric Uncertainty | N. A. Nechval, Baltic International Academy, Latvia  
K. N. Nechval, Transport and Telecommunication Institute, Latvia |
| Chapter 2 | A Multiresponse Optimization Model for Statistical Design of Processes with Discrete Variables | Taha-Hossein Hejazi, Sadjad University of Technology, Iran  
Leilanaz Akbari, Ferdowsi University of Mashhad, Iran |
| Chapter 3 | Design Optimization of a Wind Turbine Using Artificial Intelligence | Jagan Jayabalan, Galgotias University, India  
Dalkilic Yildirim, Erzincan University, Turkey  
Dookie Kim, Kunsan National University, South Korea  
Pijush Samui, National Institute of Technology Patna, India |
| Chapter 4 | Optimization of Process Parameters Using Taguchi Coupled Genetic Algorithm: Machining in CNC Lathe | Supriyo Roy, Birla Institute of Technology, India  
J. Paulo Davim, University of Aveiro, Portugal  
Kaushik Kumar, Birla Institute of Technology, India |
| Chapter 5 | Reliability Optimization of Complex Systems Using Cuckoo Search Algorithm | Anuj Kumar, University of Petroleum and Energy Studies, India  
Sangeeta Pant, University of Petroleum and Energy Studies, India  
S. B. Singh, G. B. Pant University of Agriculture and Technology, India |
Chapter 6
Multi-Objective Optimization of Die-Sinking EDM Process on AISI P-20 Tool Steel Using Cuckoo Search and Genetic Algorithm
Goutam Kumar Bose, Haldia Institute of Technology, India & West Bengal University of Technology, India
Pritam Pain, Haldia Institute of Technology, India
Sayak Mukhopadhyay, Haldia Institute of Technology, India

Chapter 7
Introduction to System Reliability Evaluation through Bayesian Approach
M. Kumar, National Institute of Technology Calicut, India
P. N. Bajeel, National Institute of Technology Calicut, India

Chapter 8
Reliability Analysis of Engineering Systems: An Accelerated Life Testing for Boiler Tubes
Taha-Hossein Hejazi, Sadjad University of Technology, Iran
Hossein Poursabbagh, Ferdowsi University of Mashhad, Iran

Chapter 9
Monte Carlo Simulation for Reliability-Based Design of Automotive Complex Subsystems
Taha-Hossein Hejazi, Sadjad University of Technology, Iran
Amirmohsen Hejazi, Sahand University of Technology, Iran

Chapter 10
Reliability Analysis of Two Dissimilar-Cold Standby Redundant Systems Subject to Inspection with Preventive Maintenance Using Copula
Beena Nailwal, G. B. Pant University of Agriculture and Technology, India
S. B. Singh, G. B. Pant University of Agriculture and Technology, India

Chapter 11
Welding Process under Fault Coverage Approach for Reliability and MTTF
Nupur Goyal, Graphic Era University, India
Mangey Ram, Graphic Era University, India
Pranshu Kumar, Graphic Era University, India

Chapter 12
Electrical Impedance Modeling of Electrochemical Spark Micromachining Process
Anjali Vishwas Kulkarni, Indian Institute of Technology Kanpur, India

Chapter 13
Development of a Material Constitutive Model and Simulation Technique to Predict Nonlinearities in Piezoelectric Materials under Weak Electric Fields
M. K. Samal, Bhabha Atomic Research Centre, India & Homi Bhabha National Institute, India
Chapter 14
Walking Control of Humanoid Robots on Uneven Ground Using Fuzzy Algorithm
Saeed Abdolshah, University of Padova, Italy
Mohammad Abdolshah, Islamic Azad University – Semnan, Iran
Majid Abdolshah, University of Tehran, Iran
S. Vahid Hashemi, Semnan University, Iran

Chapter 15
Development of Path Tracking Control Algorithm for a 4 DOF Spatial Manipulator Using PID Controller
Pradeep Reddy Bonikila, Indian Institute of Technology Bhubaneswar, India
Ravi Kumar Mandava, Indian Institute of Technology Bhubaneswar, India
Pandu Ranga Vundavilli, Indian Institute of Technology Bhubaneswar, India

Chapter 16
Efficient Planning: In-Service Inspections of Fatigued Structures under Parametric Uncertainty
N. A. Nechval, Baltic International Academy, Latvia
K. N. Nechval, Transport and Telecommunication Institute, Latvia

Chapter 17
Yuriy V. Kostyuchenko, Scientific Centre for Aerospace Research of the Earth, National Academy of Sciences of Ukraine, Ukraine
Dmytro Movchan, Scientific Centre for Aerospace Research of the Earth, National Academy of Sciences of Ukraine, Ukraine
Igor Artemenko, Scientific Centre for Aerospace Research of the Earth, National Academy of Sciences of Ukraine, Ukraine
Ivan Kopachevsky, Scientific Centre for Aerospace Research of the Earth, National Academy of Sciences of Ukraine, Ukraine

Chapter 18
Journey from Order to Chaos and Returning
Anuraj Singh, Graphic Era University, India

Chapter 19
Combustion Instability Analysis Using Wavelets in Conventional Diesel Engine
Rakesh Kumar Maurya, Indian Institute of Technology Ropar, India
Akhil Nekkanti, Indian Institute of Technology Ropar, India
Chapter 20
Numerical Simulation of High Temperature Deformation Behavior of Nickel-Based Superalloys
Using Crystal Plasticity Models and Finite Element Method

M. K. Samal, Bhabha Atomic Research Centre, India & Homi Bhabha National Institute, India
