Acknowledgment

An SME book like this results only from the contributions of many talented people. I would like to acknowledge and thank all of those involved in the development of this book. The whole team at IGI Global was very abetting and accessible. Their support was fascinating, timely useful and appreciated. In particular, I wish to thank Austin M. DeMarco, Managing Editor – Book Development at IGI Global.

The team of reviewers deserves special gratitude as they profusely contributed their resources and knowledge to enable an excellent review process. Frequently the work associated with chapter review is not appreciated enough – thanks to all of you for your excellent work.

Thank you to the Advisory Board members, all of whom supported the editor in developing this publication project and sharing valuable ideas about small and medium-sized enterprises. Each of the Board members is a very busy professional in their own field of expertise and I undoubtedly appreciate their great contribution to the book.

Lastly, I would like to thank the chapter authors that make up this book for their clear and informative explanations of the powerful SME concepts and optimization tools. In this era of technology and the Internet, while most of the underlying concepts only seem to remain fixed, SME applications are changing dynamically, compelling the authors to recommit themselves to their professions. Without their acumen, this book would naturally not be conceivable.
