Computing Information Technology: The Human Side

Table of Contents

Preface ........................................................................................................................................... vii
   Steven Gordon, Babson College, USA

SECTION I: WEB SITE USER INTERFACE

Chapter I. Navigational Tools in Hypertext Information Retrieval
Frames and an Expandable Table of Contents ................................................................. 1
   Rawiwan Tenissara, Information Systems Education Center, National
   Institute of Development Administration, Thailand

Chapter II. Website Interactivity and Amusement: Techniques
and Effects .............................................................................................................................. 22
   Yuan Gao, Ramapo College of New Jersey, USA

Chapter III. Techniques for Visualizing Website Usage Patterns with an
Adaptive Neural Network ................................................................................................. 35
   Victor Perotti, Rochester Institute of Technology College of Business, USA

Chapter IV. Using Usability Factors to Predict the E-Commerce User
Experience .............................................................................................................................. 41
   Adrie Stander, University of Cape Town, South Africa
   Nata van der Merwe, University of Cape Town, South Africa

SECTION II: INTERFACE DESIGN AND USABILITY

Chapter V. Social Issues in the Administration of Information Systems
Survey Research .................................................................................................................... 49
   Susan K. Lippert, Drexel University, USA
Chapter VI. User Interfaces and Markup Language Programming: The Effects of Interaction Mode on User Performance and Satisfaction ..... 78
Jeffrey Hsu, Fairleigh Dickinson University, USA

Chapter VII. Development of a Task Model for the Analysis and Retrieval of Statistical Data ................................................................. 110
Peter N. Hyland, University of Wollongong, Australia

SECTION III: END USER COMPUTING

Chapter VIII. Media Selection and End-User Satisfaction: An Empirical Study of Help-Desk Using SERVQUAL ................................. 134
Sang-Gun Lee, University of Nebraska-Lincoln, USA
Sangjin Yoo, Keimyung University, Korea
Zoonky Lee, University of Nebraska-Lincoln, USA

Chapter IX. End User Support Usage ...................................................... 146
Robin Munkvold, Nord-Trøndelag University College, Norway

Chapter X. Users as Developers — Conditions and Effects of User Systems Development ................................................................. 161
Anders Avdic, Örebro University, Sweden

Chapter XI. Solving Common Business Problems with Microsoft Office® ................................................................. 171
Kathryn Marold, Metropolitan State College of Denver, USA
Gwynne Larsen, Metropolitan State College of Denver, USA

SECTION IV: INFORMATION TECHNOLOGY AND THE ORGANIZATION

Chapter XII. Changing a Business School Corporate Culture: Teaching in the 21st Century on a Different Blackboard .......................... 191
Jennifer Paige Nightingale, Duquesne University, USA

Chapter XIII. The Role of the Organizational Context in the Use of a Workflow System: Lessons from a Case Study ............................ 201
Anabela Sarmento, ISCAP-IPP, Portugal

Chapter XIV. Strategic Models for the Delivery of Personal Financial Services: The Role of Infocracy ................................................. 220
Steven Gordon, Babson College, USA
Paul Mulligan, Babson College, USA
Chapter XV. Role of Behavioral Factors in Strategic Alliances ............... 233
Chong Kim, Marshall University, USA
Purnendu Mandal, Marshall University, USA
Dale H. Shao, Marshall University, USA

SECTION V: THE HUMAN SIDE IN IT RESEARCH

Chapter XVI. Building a Custom Client-Side Research Tool for Online Web-Based Experiments ................................................................. 253
Stu Westin, University of Rhode Island, USA

Chapter XVII. Towards a Sociopragmatic-Constructivist Understanding of Information Systems ................................................................. 267
Boris Wyssusek, Technical University of Berlin, Germany
Martin Schwartz, Dr. Glinz & Partner, Germany

About the Authors ............................................................................. 298

Index .............................................................................................. 305
