Table of Contents

Preface ................................................................................................................................................... xviii
Acknowledgment .................................................................................................................................. xxiii

Section 1
Information Theoretical Results on Cooperative Communications

Chapter 1
Information Theoretical Limits on Cooperative Communications ....................................................... 1
Melda Yuksel, TOBB University of Economics and Technology, Turkey
Elza Erkip, Polytechnic Institute of New York University, USA

Chapter 2
Overview of Amplify-and-Forward Relaying ......................................................................................... 29
Ioannis Krikidis, University of Edinburgh, UK
John S. Thompson, University of Edinburgh, UK

Chapter 3
Power Allocation for Cooperative Communications ............................................................................... 62
Onur Kaya, Işık University, Turkey
Sennur Ulukus, University of Maryland, USA

Chapter 4
Capacity Limits of Base Station Cooperation in Cellular Networks ....................................................... 102
Symeon Chatzinotas, University of Surrey, UK
Muhammad Ali Imran, University of Surrey, UK
Reza Hoshyar, University of Surrey, UK
Section 2
Practical Coding Schemes for Cooperative Communications

Chapter 5
Source and Channel Coding Techniques for Cooperative Communications........................................... 135
  John M. Shea, University of Florida, USA
  Tan F. Wong, University of Florida, USA
  Chan Wong Wong, University of Florida, USA
  Byonghyok Choi, University of Florida, USA

Chapter 6
Network Coding for Multi-Hop Wireless Networks.................................................................................. 187
  Meng Yu, Lehigh University, USA
  Jing (Tiffany) Li, Lehigh University, USA
  Haidong Wang, Thales Communications Inc., USA

Section 3
Distributed Transmit and Receive Diversity Techniques for Cooperative Communications

Chapter 7
Cross-Layer Cooperative Beamforming for Wireless Networks......................................................... 207
  Lun Dong, Drexel University, USA
  Athina P. Petropulu, Drexel University, USA
  H. Vincent Poor, Princeton University, USA

Chapter 8
Distributed Space-Time Block Coding for Amplify-and-Forward Cooperative Networks............... 238
  Zhihang Yi, Queen's University, Canada
  Il-Min Kim, Queen's University, Canada

Chapter 9
Relay Selection in Cooperative Networks............................................................................................... 260
  Elżbieta Beres, University of Toronto, Canada
  Raviraj Adve, University of Toronto, Canada

Chapter 10
Energy Efficient Communication with Random Node Cooperation.................................................... 280
  Zhong Zhou, University of Connecticut, USA
  Jun-Hong Cui, University of Connecticut, USA
  Shengli Zhou, University of Connecticut, USA
  Shuguang Cui, Texas A&M University, USA
Chapter 11
Diversity Combining for Cooperative Communications ........................................... 301

Diomidis S. Michalopoulos, Aristotle University of Thessaloniki, Greece
George K. Karagiannidis, Aristotle University of Thessaloniki, Greece

Chapter 12
Single and Double-Differential Coding in Cooperative Communications ....................... 321

Manav R. Bhatnagar, University of Oslo, Norway
Are Hjørungnes, University of Oslo, Norway

Chapter 13
Space-Time Coding For Non-Coherent Cooperative Communications ........................ 352

J. Harshan, Indian Institute of Science, India
G. Susinder Rajan, Indian Institute of Science, India
B. Sundar Rajan, Indian Institute of Science, India

Section 4
Broadband Cooperative Communications

Chapter 14
Resource Allocation for a Cooperative Broadband MIMO-OFDM System .......................... 382

Ibrahim Y. Abualhaol, Broadcom Corporation, USA
Mustafa M. Matalgah, University of Mississippi, USA

Chapter 15
Single-Carrier Frequency Domain Equalization for Broadband Cooperative Communications .... 399

Tae-Won Yune, POSTECH, Republic of Korea
Dae-Young Seol, POSTECH, Republic of Korea
Dongsik Kim, POSTECH, Republic of Korea
Gi-Hong Im, POSTECH, Republic of Korea

Section 5
Mathematical Tools for the Analysis and Design of Cooperative Networks

Chapter 16
Applications of Majorization Theory in Space-Time Cooperative Communications ............ 429

Aydin Sezgin, Stanford University, USA
Eduard A. Jorswieck, TU Dresden, Germany

Chapter 17
Data Gathering in Correlated Wireless Sensor Networks with Cooperative Transmission ....... 471

Laxminarayana S. Pillutla, The University of British Columbia, Canada
Vikram Krishnamurthy, The University of British Columbia, Canada
Chapter 18
Cooperative Broadcast in Large-Scale Wireless Networks ................................................................. 497
  Birsen Sirkeci-Mergen, San Jose State University, USA
  Anna Scaglione, University of California at Davis, USA
  Michael Gastpar, University of California at Berkeley, USA

Section 6
An Industrial Perspective on Cooperative Communications

Chapter 19
Cooperative Communication System Architectures for Cellular Networks ............................... 522
  Mischa Dohler, CTTC, Spain
  Djamal-Eddine Meddour, Orange Labs, France
  Sidi-Mohammed Senouci, Orange Labs, France
  Hassnaa Moustafa, Orange Labs, France

Compilation of References .................................................................................................................. 548

About the Contributors ....................................................................................................................... 584

Index .................................................................................................................................................. 598
