Advanced Topics in End User Computing

Table of Contents

Introduction .................................................................................................. viii  
Mo Adam Mahmood, University of Texas at El Paso, USA

Section I: Medical Informatics

Chapter I
Introducing Computer-Based Telemedicine in Three Rural Missouri Counties ........................................... 1  
Kimberly D. Harris, Duquesne University, USA
Joseph F. Donaldson, University of Missouri at Columbia, USA
James D. Campbell, University of Missouri at Columbia, USA

Chapter II
Case Study of a Patient Data Management System:  
A Complex Implementation in an Intensive Care Unit ................. 19  
Nathalie Mitev, The London School of Economics, UK
Sharon Kerkham, Salford University, UK

Chapter III
Experiences from Health Information System Implementation Projects Reported in Canada Between 1991 and 1997 ................................................................. 36  
Francis Lau, University of Alberta, Canada
Marilynne Hebert, University of British Columbia, Canada

Chapter IV
Nursing Staff Requirements for Telemedicine in the Neonatal Intensive Care Unit ........................................... 52  
Tara Qavi, Flow Interactive Ltd., UK
Lisa Corley, University of Salford, UK
Steve Kay, University of Salford, UK
Chapter V
End-User Directed Requirements–A Case in Medication Ordering ................................................................. 72
Stephen L. Chan, Hong Kong Baptist University, Hong Kong

Chapter VI
VDT Health Hazards: A Guide for End Users and Managers ............. 83
Carol Clark, Middle Tennessee State University, USA

Section II: The Role of End User Interface, Training and Attitudes toward Information Systems Success

Chapter VII
The Role of Training in Preparing End Users to Learn Related Software Packages ........................................ 94
Conrad Shayo, California State University, USA
Lorne Olfman, Claremont Graduate University, USA

Chapter VIII
The Human Side of Information Systems Development:
A Case of an Intervention at a British Visitor Attraction ............... 116
Brian Lehaney, The University of Luton Business School, UK
Steve Clarke, The University of Luton Business School, UK
Sarah Spencer-Matthews, Swinburne University of Technology, Australia
Vikki Kimberlee, The University of Luton Business School, UK

Chapter IX
Exploring the Relationship between Institutional Context, User Participation, and Organizational Change in a European Telecommunications Company ........................ 129
Tom Butler, University College Cork, Ireland
Brian Fitzgerald, University College Cork, Ireland

Chapter X
Studying the Translations of NHSnet ................................................. 158
Edgar A. Whitley, London School of Economics and Political Science, UK
Athanasia Pouloudi, Brunel University, UK

Chapter XI
Predicting End User Performance ...................................................... 177
I. M. Jawahar, Illinois State University, USA
B. Elango, Illinois State University, USA
Chapter XII
The Role of User Ownership and Positive User Attitudes in the Successful Adoption of Information Systems within NHS Community Trusts ................................................................. 188
Crispin R. Coombs, Loughborough University, UK
Neil F. Doherty, Loughborough University, UK
John Loan-Clarke, Loughborough University, UK

Chapter XIII
The Effect of Individual Differences on Computer Attitudes ............ 210
Claudia Orr, Northern Michigan University, USA
David Allen, Northern Michigan University, USA
Sandra Poindexter, Northern Michigan University, USA

Chapter XIV
Computer Viruses: Winnowing Fact from Fiction ........................ 233
Stu Westin, University of Rhode Island, USA

Section III: Decision Support Systems and Artificial Neural Networks

Chapter XV
Success Surrogates in Representational Decision Support Systems ........................................................................... 243
Roger McHaney, Kansas State University, USA
Timothy Paul Cronan, University of Arkansas, USA

Chapter XVI
A Decision Support System for Prescriptive Academic Advising ........................................................................... 263
Louis A. Le Blanc, Berry College, USA
Conway T. Rucks, University of Arkansas at Little Rock, USA
W. Scott Murray, University of Arkansas at Little Rock, USA

Chapter XVII
Martin D. Crossland, Oklahoma State University, USA
Richard T. Herschel, St. Joseph’s University, USA
William C. Perkins, Indiana University, USA
Joseph N. Scudder, Northern Illinois University, USA
Chapter XVIII
Are Remote and Non-Remote Workers Different?
Exploring the Impact of Trust, Work Experience and
Connectivity on Performance Outcomes ................................................ 302
  D. Sandy Staples, Queen's University, Canada

Chapter XIX
Measuring the Impact of Information Systems on
Organizational Behavior ............................................................................ 325
  R. Wayne Headrick, New Mexico State University, USA
  George W. Morgan, Southwest Texas State University, USA

Chapter XX
A New Approach to Evaluating Business Ethics:
An Artificial Neural Networks Application ............................................. 334
  Mo Adam Mahmood, University of Texas at El Paso, USA
  Gary L. Sullivan, University of Texas at El Paso, USA
  Ray-Lin Tung, Taiwan

Comprehensive Bibliography ................................................................... 351

About the Authors ...................................................................................... 396

Index .......................................................................................................... 403
