# Current Issues in IT Education

## Table of Contents

**Preface** .......................................................................................................................................................... viii  
_Tanya McGill, Murdoch University, Australia_

## SECTION I: INFORMATION TECHNOLOGY DEGREE ISSUES

**Chapter I. Belief, Inquiry, Argument and Reflection as Significant Issues in Learning about Information Systems Development Methodologies** ........................................... 1  
_David A. Banks, University of South Australia, Australia_

**Chapter II. Making the Case for Case-Based Learning in Computer Information Systems** ....................................................................................................................... 11  
_Morgan M. Jennings, Metropolitan State College of Denver, USA  
Charles H. Mawhinney, Metropolitan State College of Denver, USA  
Janos Fustos, Metropolitan State College of Denver, USA_

**Chapter III. Introducing Information Systems Students to Research with a Structured Group Project** ........................................................................................................................... 26  
_Tanya McGill, Murdoch University, Australia_

**Chapter IV. Making Way for Java in an Information Technology Masters Program** .................................................................................................................................................. 34  
_Wendy Lucas, Bentley College, USA_

**Chapter V. Analysis of Learner Performance on a Tutoring System for Java** .......... 46  
_Henry H. Emurian, University of Maryland–Baltimore County, USA  
Jingli Wang, University of Maryland–Baltimore County, USA  
Ashley G. Durham, Centers for Medicare & Medicaid Services (CMS), USA_
Chapter VI. Supporting Creativity in Software Development: An Application in IT Education ................................................................. Aybüke Aurum, The University of New South Wales, Australia
Meliha Handzic, The University of New South Wales, Australia
Adrian Gardiner, The University of New South Wales, Australia

Chapter VII. Training in Remote Database Server Administration ......................... 88
Ludwig Slusky, California State University, Los Angeles, USA
Parviz Partow-Navid, California State University, Los Angeles, USA

Chapter VIII. Conceiving Architectural Aspects for Quality Software Education through the Constructivist Perspective .................................. 98
Kam Hou Vat, University of Macau, Macau

Chapter IX. The TCP/IP Game ........................................................................... 117
Norman Pendegraft, University of Idaho, USA

Chapter X. Framing Leadership Issues for System Developers ......................... 125
Gayla Jo Slauson, Mesa State College, USA
Chad Grabow, Mesa State College, USA

Chapter XI. S3: Senior Surf School–A Special Graduate Information Systems Course ........................................................................... 133
Georg Disterer, University of Applied Sciences and Arts, Hannover, Germany

Chapter XII. How Do IT Students Stay Up to Date with Employers’ Skill Requirements? ................................................................. 144
Tanya McGill, Murdoch University, Australia
Michael Dixon, Murdoch University, Australia

Chapter XIII. Education for a Technology-Based Profession: Softening the Information Systems Curriculum .............................................. 153
Rodney Turner, Victoria University of Technology, Australia
Glenn Lowry, United Arab Emirates University, UAE

Chapter XIV. Tracking Through Information Technology Education ..................... 173
Erick D. Slazinski, Purdue University, USA
Susan K. Lisack, Purdue University, USA

Chapter XV. Designing e-Business and e-Commerce Courses to Meet Industry Needs ..................................................................................... 185
Anthony D. Stiller, University of the Sunshine Coast, Australia

Chapter XVI. Adding Reality to Team Projects: E-Business Consulting for Small Business Entities .......................................................... 198
Sharon W. Tabor, Boise State University, USA
SECTION II: INFORMATION TECHNOLOGY LITERACY

Chapter XVII. Metacognition in Information Systems Education .............................. 213
Steve Benson, Edith Cowan University, Australia

Chapter XVIII. Required Software Proficiency in General Education and Business Courses ......................................................... 223
Linda Lynam, Central Missouri State University, USA

Chapter XIX. Technology Literacy Issues for Freshmen Education Majors in a Leading Teacher Program ........................................... 228
David D. Carbonara, Duquesne University, USA

Chapter XX. Assessing Computer Literacy: A Comparison of Self-Assessment and Actual Skills .......................................................... 238
George Easton, San Diego State University, USA
Annette Easton, San Diego State University, USA

Chapter XXI. Using Modulization Approach to Design Instructional Systems for Computer Literacy Courses ...................................... 255
Kuan C. Chen, Purdue University, Calumet, USA

Chapter XXII. Information Technologies in Educational Organizations: An Innovative Collaborative Course Development, Delivery and Evaluation .......... 268
Pamela Lipe Revercomb, Syracuse University, USA
Ruth V. Small, Syracuse University, USA

Chapter XXIII. Developing Graduate Qualities ......................................................... 286
Ann Monday, University of South Australia, Australia
Sandra Barker, University of South Australia, Australia

Chapter XXIV. Real Live Cases in Training Management of Information Resources During the Transition to Market Economy ........................................ 297
Dimitar Christozov, American University in Bulgaria, Bulgaria

Chapter XXV. Business Students as End-User Developers: Simulating “Real Life” Situations through Case Study Approach ........................................... 304
Sandra Barker, University of South Australia, Australia

Chapter XXVI. E-Business Education for Everyone: Developing and Implementing Breakthrough Strategies (Or How Can IT Practitioners and Educators Make Computer Morons Surf and Steer on E-Business Space) ......................... 313
Rumel V. Atienza, De La Salle University, Philippines

Chapter XXVII. Information Management in Public Sector Agencies: A Context-Sensitive Conceptual Framework of CIO Competence ......................... 323
Maurice W. Green, University of Washington, USA
SECTION III: INFORMATION TECHNOLOGY IN EDUCATION

Chapter XXVIII. Empirical Study of Students’ Perceptions of Online Courses ...... 357
Judith C. Simon, The University of Memphis, USA
Lloyd D. Brooks, The University of Memphis, USA
Ronald B. Wilkes, The University of Memphis, USA

Chapter XXIX. Community Informatics—Enabling Emancipatory Learning .......... 367
Wal Taylor, Central Queensland University, Australia
John Dekkers, Central Queensland University, Australia
Stewart Marshall, Central Queensland University, Australia

Chapter XXX. An Examination of ICT Planning Maturity in Schools:
A Stage Theory Perspective ................................................................. 376
Julie Mackey, Christchurch College of Education, New Zealand
Annette Mills, University of Canterbury, New Zealand

Chapter XXXI. On-Line Case Discussion: A Methodology ............................... 396
Henri Isaac, Paris Dauphine University, France

Chapter XXXII. A Comparison Between the Use of IT in Business and Education:
Applications of the Internet to Tertiary Education ........................................... 404
Stephen Burgess, Victoria University, Australia
Paul Darbyshire, Victoria University, Australia

Chapter XXXIII. Virtual Government: Online-Services within the Public Sector .. 416
Birgit J. Oberer, University of Klagenfurt, Austria

About the Authors ..................................................................................... 432
