Design Patterns
Formalization Techniques

Table of Contents

Foreword.............................................................................................................................. vi
Preface............................................................................................................................... viii

Chapter I
An Integrated Approach to Design Patterns Formalization ................................. 1
_Toufik Taibi, United Arab Emirates University, UAE_

Chapter II
A Visual Language for Design Pattern Modeling and Instantiation .................. 20
_David Maplesden, Orion Systems Ltd., New Zealand_
_John Hosking, University of Auckland, New Zealand_
_John Grundy, University of Auckland, New Zealand_

Chapter III
A Generic Model of Object-Oriented Patterns Specified in RSL ...................... 44
_Andrés Flores, University of Comahue, Argentina_
_Alejandra Cechich, University of Comahue, Argentina_
_Gabriela Aranda, University of Comahue, Argentina_

</table>
| IV      | Patterns of Collective Behavior in Ocsid | Joni Helin, Tampere University of Technology, Finland  
Pertti Kellomäki, Tampere University of Technology, Finland  
Tommi Mikkonen, Tampere University of Technology, Finland |
| V       | Formal Specification and Verification of Design Patterns | Jing Dong, University of Texas at Dallas, USA  
Paulo Alencar, University of Waterloo, Canada  
Donald Cowan, University of Waterloo, Canada |
| VI      | SPINE: Language for Pattern Verification | Alex Blewitt, Edinburgh University, UK |
| VII     | Intent-Oriented Design Pattern Formalization Using SPQR | Jason Smith, IBM T.J. Watson Research, USA  
David Stotts, University of North Carolina at Chapel Hill, USA |
| VIII    | Formalising Design Patterns as Model Transformations | Kevin Lano, King’s College, UK |
| IX      | The Role-Based Metamodeling Language for Specifying Design Patterns | Dae-Kyoo Kim, Oakland University, USA |
| X       | Modeling and Reasoning about Design Patterns in SLAM-SL | Angel Herranz, Universidad Politécnica de Madrid, Spain  
Juan José Moreno-Navarro, IMDEA Software, Spain |
| XI      | The Applications and Enhancement of LePUS for Specifying Design Patterns | Rajeev R. Raje, Indiana University-Purdue University Indianapolis, USA  
Sivakumar Chinnasamy, Verizon Information Services, USA  
Andrew M. Olson, Indiana University-Purdue University Indianapolis, USA  
William Hidgon, University of Indianapolis, USA |
| XII     | An Ontology Based Representation of Software Design Patterns | Jens Dietrich, Massey University, New Zealand  
Chris Elgar, SolNet Solutions Limited, New Zealand |
Chapter XIII
Precision, Flexibility, and Tool Support: Essential Elements of Pattern Formalization .......................................................... 280
Neelam Soundarajan, The Ohio State University, USA
Jason O. Hallstrom, Clemson University, USA

Chapter XIV
Formalizing Patterns with the User Requirements Notation.................. 302
Gunter Mussbacher, University of Ottawa, Canada
Daniel Amyot, University of Ottawa, Canada
Michael Weiss, Carleton University, Canada

Chapter XV
A Pattern Enforcing Compiler (PEC) for Java: A Practical Way to Formally Specify Patterns.................................................. 324
Howard Lovatt, Macquarie University, Australia
Anthony M. Sloane, Macquarie University, Australia
Dominic R. Verity, Macquarie University, Australia

Chapter XVI
LePUS: A Formal Language for Modeling Design Patterns................... 357
Epameinondas Gasparis, University of Essex, UK

About the Authors.......................................................................................... 373
Index .............................................................................................................. 381
