# Diversity in Information Technology Education: Issues and Controversies

## Table of Contents

Foreword ............................................................................................ vi

Preface ................................................................................................ x

Chapter I  
Dimensions of Diversity in the IT Classroom Onground and Online .. 1  
*Madhumita Bhattacharya, Massey University, New Zealand*  
*Lone Jorgensen, Massey University, New Zealand*

Chapter II  
Dialectic Argumentation for Promoting Dialogue in IT Education:  
An Epistemological Framework for Considering the Social Impacts  
of IT .................................................................................................... 15  
*John R. Dakers, University of Glasgow, UK*

Chapter III  
Bridging the Digital Divide: A Feminist Perspective on the Project . 38  
*Mary Kirk, Metropolitan State University, USA*

Chapter IV  
Gender and Programming: Mixing the Abstract and the Concrete .. 68  
*Peter McKenna, Manchester Metropolitan University, UK*
Chapter V
Dimensions of Sustainable Diversity in IT: Applications to the IT College Major and Career Aspirations Among Underrepresented High School Students of Color .......................................................... 92
Russell Stockard, California Lutheran University, USA
Ali Akbari, California Lutheran University, USA
Jamshid Damooei, California Lutheran University, USA

Chapter VI
Under-Representation of African American Women Pursuing Higher-Level Degrees in the Computer Science Technology Fields ... 129
Alfreda Dudley-Sponaugle, Towson University, USA

Chapter VII
Working with Students in Math, Technology, and Sciences for Better Success: One Faculty Member’s Experience ...................... 141
Shirish Shah, Towson University, USA
Tracy Miller, Towson University, USA

Chapter VIII
Assessing Diversity Issues in Instructional Technology: Strategies that Enhance Student Learning and Generate Outcomes Assessment Data ........................................................... 153
Virginia Johnson Anderson, Towson University, USA

Chapter IX
The Open Ended Group Project: A Way of Including Diversity in the IT Curriculum ................................................................. 166
Xristine Faulkner, London South Bank University, UK
Mats Daniels, Uppsala University, Sweden
Ian Newman, Loughborough University, UK

Chapter X
Attack of the Rainbow Bots: Generating Diversity through Multi-Agent Systems ................................................................. 196
Samuel G. Collins, Towson University, USA
Goran P. Trajkovski, Towson University, USA
Chapter XI
Adaptive Technology in a Computing Curriculum ....................... 242
   Blaise W. Liffick, Millersville University, USA

Chapter XII
Tessellations: A Tool for Diversity Infusions in the Curriculum .... 262
   Reza Sarhangi, Towson University, USA
   Gabriele Meiselwitz, Towson University, USA
   Goran P. Trajkovski, Towson University, USA

Chapter XIII
Training Faculty for Diversity Infusion in the IT Curriculum ....... 280
   Goran P. Trajkovski, Towson University, USA

About the Authors ................................................................. 310
