Acknowledgment

Without the able editorial assistance of Steve Gardner, the book would be diminished although of course the final responsibility is ours. We would like to acknowledge the contribution of our many colleagues who gave their time freely to participate in the peer review process. We would also like to thank Professor Lawrence Tomei for his support of our work over the past several years. Our small Editorial Advisory Group, Dr. Di Challis, Dr. Dale Holt and Dr. Jennifer Weir also provided ad hoc advice on a number of matters at short notice. In particular we acknowledge the contribution of our friend and colleague, the late Associate Professor Malcolm Eley, who helped us see that the design of assessment practices was ultimately in the service of our students.
