Acknowledgment

The editor would like to thank all of the authors for their insights and excellent contributions to this book. I also want to thank the anonymous reviewers who assisted me in the peer-reviewing process and provided comprehensive, critical, and constructive reviews. Each Editorial Advisory Board member has made a big contribution in terms of guidance and assistance. I owe my thanks to ChunKai Szu and Shaunte Ames, two Editor Assistants, for lending a hand in the whole tedious process.

The editor wishes to acknowledge the help of all involved in the development process of this book, without whose support the project could not have been satisfactorily completed. Fatiha Ouali and Ana Kozyreva, two Graduate Assistants, are hereby graciously acknowledged for their diligent work. A further special note of thanks goes to the staff at IGI Global, whose contributions have been invaluable throughout the entire process, form inception to final publication. Particular thanks go to Kristin M. Roth, Managing Development Editor and Jan Travers, who continuously prodded via e-mail to keep the project on schedule, and to Mehdi Khosrow-Pour, whose enthusiasm motivated me to accept his invitation to join this project.

My appreciation is also due to Montclair State University for awarding me different Faculty Research and Career Development Funds. I would also like to extend my thanks to my brothers Zhengxian Wang, Shubert Wang (an artist, http://www.portraitartist.com/wang/wang.asp), and sister Jixian Wang, who stood solidly behind me and contributed in their own sweet little ways. Thanks go to all Americans, since it would not have been possible for the four of us to come to the U.S. without the support of our scholarships.

Finally, I want to thank my family: my parents, Houde Wang and Junyan Bai for their encouragement; my wife Hongyu Ouyang for her unfailing support, and my sons Leigh Wang and Leon Wang for being without a dad during this project up to two years.

John Wang, PhD
Professor of Information & Decision Sciences
Dept. Management & Information Systems
School of Business
