Contents
by Volume

Active Queue Management / Michele Mara de Araújo Espíndula Lima and Nelson Luis Saldanha da Fonseca .............................................................. 1

Adaptive Routing Quality of Service Algorithms for Internet’s Irregular Traffic / Abdelhamid Mellouk ................................................................. 7

Adaptive Transmission of Multimedia Data over the Internet / Christos Bouras, Apostolos Gkamas, Dimitris Primpas, and Kostas Stamos .................................................. 16

Addressing the Credibility of Web Applications / Pankaj Kamthan ................................................. 23

ADSL2+ Technology / D. Kagklis, S. Androulidakis, G. Patikis, and T. Doukoglou ........................................ 29

Advanced Techniques for Web Content Filtering / Elisa Bertino, Elena Ferrari, Andrea Perego, and Gian Piero Zarri ................................................. 36

Agent-Based Web Services / Larbi Esmahi and Ylber Ramadani ......................................................... 45

ALBA Cooperative Environment for Scientific Experiments / Andrea Bosin, Nicoletta Dessi, Maria Grazia Fugini, Diego Liberati, and Barbara Pes ................................................ 52

Analysis of TCP-Friendly Protocols for Media Streaming / Gábor Hosszú and Dávid Tegze ............. 59

Autonomic Computing / Kevin Curran, Maurice Mulvenna, Chris Nugent, and Matthias Baumgarten 66

Autonomic Networking / Pantelis N. Karamolegkos, Charalampos Patrikakis, and Emmanuel Protonotarios ................................................................. 72

Cfengine Configuration Management Agent / Mark Burgess ............................................................ 79

Clustering Model of the Application-Level Multicast, A / Gábor Hosszú and Raymond Pardede .......... 86

Collaborative Support for Graphical-Based Design Tools / Wong Kok Seng, Sellappan Palaniappan, and Nor Adnan Yahaya ................................................................. 93

IP Multicasting / Robert R. Chodorek ........................................................................................................ 242

IP Multimedia Subsystem (IMS) for Emerging All-IP Networks / Muhammad Sher, Fabricio Carvalho de Gouveia, and Thomas Magedanz ................................................................. 249

Issues and Applications of Internet Traffic Modelling / Rachel Babiarz and Jean-Sebastien Bedo ...... 263

Java Web Application Frameworks / Tony C. Shan and Winnie W. Hua ........................................ 269

Light-Weight Content-Based Search for File Sharing Systems / Gábor Richly, Gábor Hosszú, and Ferenc Kovács ........................................................................................................................................... 277

Malicious Software / Thomas M. Chen and Gregg W. Tally ............................................................... 284

Mobility Protocols / Sherali Zeadally and Farhan Siddiqui ............................................................... 291

Model-Driven Engineering of Distributed Applications / Karim El Guemhioui .................................. 299

Modeling IP Traffic Behavior through Markovian Models / António Nogueira, Paulo Salvador, Rui Valadas, and António Pacheco ......................................................................................................... 305

Multicast of Multimedia Data / Christos Bouras, Apostolos Gkamas, Dimitris Primpas, and Kostas Stamos ........................................................................................................................................ 316

Multimedia for Mobile Devices / Kevin Curran ................................................................................. 323

Multimedia Internet Applications over WiMAX Networks: State-of-the-Art and Research Challenges / Nicola Scalabrino, Daniele Miorandi, Enrico Gregori, and Imrich Chlamtac ................................................................................................................................. 331

Network Optimization Using Evolutionary Algorithms in Multicast Transmission / Yezi Donoso and Ramón Fabregat .............................................................................................................. 339

Network Survivability in Optical Networks with IP Prospective / Hongsik Choi and Seung S. Yang ..... 346

Network-Based Intrusion Detection / Gábor Hosszú and Zoltán Czirko................................................. 353

Network-Layer Mobility Protocols for IPv6-Based Networks / K. Daniel Wong and Ashutosh Dutta.... 360

Networked Appliances and Home Networking: Internetworking the Home / Madjid Merabti, Paul Fergus, and Omar Abuelma’atti ............................................................................................................ 367

Optical Burst Switching / Kyriakos Vlachos ....................................................................................... 375

Optical Network Survivability / N. S. C. Correia and M. C. R. Medeiros ........................................... 383

Optimizing Inter-Domain Internet Multicast / Huaqun Guo, Lek-Heng Ngoh, and Wai-Choong Wong... 391
Performance of Mobility Protocols / Sherali Zeadally and Farhan Siddiqui .......................................................... 398
Positive-Feedback Preference Model of the Internet Topology / Shi Zhou ................................................................. 407
Privacy in the Digital World / Stefanos Gritzalis and Costas Lambrinoudakis ............................................................. 411
Quality of Service and Service Level Agreements / Christos Bouras, Apostolos Gkamas, Dimitris Primpas, and Kostas Stamos ........................................................................................................ 418
Quality of Service Architectures / Christos Bouras, Apostolos Gkamas, Dimitris Primpas, and Kostas Stamos ...................................................................................................................... 425
Quality of Service by Way of Path Selection Policy / Wayne Goodridge, Hadrian Peter, and William Robertson .......................................................... 432
Quality of Service in Mobile Ad Hoc Networks / Winston K. G. Seah and Hwee-Xian Tan ................................. 441
Quality of Service Routing / Marília Curado .............................................................................................................. 449
Rate Adaptation Mechanisms for Multimedia Streaming / Charalampos Patrikakis, P. Fafali, Pantelis N. Karamolegkos, Y. Despotopoulos, and N. Minogiannis ....................................... 456
Real-Time Protocols (RTP/RTCP) / Christos Bouras, Apostolos Gkamas, Dimitris Primpas, and Kostas Stamos .................................................................................................................. 463
Rich-Club Phenomenon of the Internet Topology / Shi Zhou ...................................................................................... 469
Scalable Reservation-Based QoS Architecture (SRBQ) / Rui Prior and Susana Sargento ........................................ 473
Scaling Properties of Network Traffic / David Rincón and Sebastià Sallent ............................................................... 483
Seamless Multi-Hop Handover in IPv6-Based Hybrid Wireless Networks / Tonghong Li .......................................................... 490
Security Issues with Wi-Fi Networks / Kevin Curran and Elaine Smyth ................................................................. 498
Semantic Web, The / Kevin Curran and Gary Gumbleton .......................................................................................... 505
Semantic Web Languages and Ontologies / Livia Predoiu and Anna V. Zhdanova .................................................. 512
Semantic Web Services: A Technology for Service-Oriented Computing / Dumitru Roman, Ioan Toma, and Dieter Fensel ......................................................................................................... 519
Service Provisioning in the IP Multimedia Subsystem / Adetola Oredope and Antonio Liotta ............................................. 525
Session Initiation Protocol / Ilija Basicic and Miroslav Popovic ............................................................................. 532
Sharing Protected Web Resources / Sylvia Encheva and Sharil Tumin ......................................................................... 539
Social and P2P Networks on the Internet / Milica Stojmenovic .................................................................................. 545
Software Modernization of Legacy Systems for Web Services Interoperability / Chia-Chu Chiang ........551

Speech-Enabled Web, The / L. E. Moser and P. M. Melliar-Smith .............................................................558

Standards in Asynchronous E-Learning Systems / Sergio Gutiérrez, Abelardo Pardo, and Carlos Delgado Kloos ..........................................................................................................................568

Stream Control Transmission Protocol (SCTP) / Farhan Siddiqui and Sherali Zeadally ..................................575

Survey: Pricing Ubiquitous Network Services / Jairo A. Gutiérrez .................................................................583

Survivability Mechanisms of Generalized Multiprotocol Label Switching / M. C. R. Medeiros and N. S. C. Correia ............................................................................................................................593

Swarm Intelligence Applications for the Internet / Sergio Gutiérrez, Abelardo Pardo, and Carlos Delgado Kloos ........................................................................................................................................600

Taxonomy of Online Game Security, A / Kuen Park and Heejo Lee .............................................................606

TCP and TCP-Friendly Protocols / Agnieszka Chodorek .................................................................................612

TCP Enhancements for Mobile Internet / Bhaskar Sardar and Debasish Saha .................................................619

TCP for High-Speed Networks / Nelson Luís Saldanha da Fonseca and Neila Fernanda Michel ..................626

Towards Autonomic Infrastructures via Mobile Agents and Active Networks / Stamatis Karnouskos .......633

Towards Formulation of Principles for Engineering Web Applications / Pankaj Kamthan .......................640

Traffic Control / Thomas M. Chen .................................................................................................................. 647

Transporting TDM Service on Metropolitan Bus-Based Optical Packet Switching Networks / Viet Hung Nguyen and Tülin Atmaca ........................................................................................................653

Voice Over Internet Protocol: A New Paradigm in Voice Communication / Indranil Bose and Fong Man Chun ..................................................................................................................................663

Web Accessibility / Gregory R. Gay, Paola Salomoni, and Silvia Mirri .........................................................678

Web Mining: A Conceptual Overview on Intelligent Information Retrieval Systems / Henrik Hanke and Alf Neumann ........................................................................................................................................684

Web Services / Kevin Curran and Padraig O’Kane .........................................................................................690

Web-Based Commerce Applications: Adoption and Evaluation / Chad Lin, Helen Cripps, and Yu-An Huang .........................................................................................................................................696
Web-Based Information Systems in Construction Industry: A Case Study for Healthcare Projects / 
Alaa Abdou, John Lewis, Moh’d A. Radaideh, and Sameera Al Zarooni .......................... 702

Wi-Fi Technology / Antonios Alexiou, Dimitrios Antonellis, and Christos Bouras .................. 711
