Acknowledgment

The Handbook of Research on Hybrid Learning Models would not exist without the effort of many people whose names may not appear on the cover of the book. However, their hard work, cooperation, friendship and understanding are very important to the preparation and production of the book. Firstly, the editors of this book sincerely thank IGI Global to publish this book. In particular, we would like to thank Christine Bufton, Dave DeRicco, Lindsay Johnston, Kristin M. Klinger, Julia Mosemann, Heather A. Probst and Jan Travers, for their efforts to bring this book into existence. On the other hand, Prof. Timothy Shih supports a lot to this book. We thank him sincerely for all his help, valuable comments, and for writing a foreword to the book. The success of this book depends on the high quality chapters submitted. The editors wish to express their deep appreciation to the chapter authors who have significantly contributed to this book. Last but not least, the Editorial Advisory Board plays an important role in this book. They have reviewed the manuscript submitted and provided a lot of feedback to enhance the quality of this book. The editor would like to thank the following individuals in the Editorial Advisory Board, Kanishka Bedi, Raj Boora, Giuliana Dettori, Wolfgang Halang, Yoko Hirata, Diana Rosario Pérez Marin, Iwona Miliszewska, Sabine Moebes, Barbara O’Byrne, Zhiyong Peng, Stephan Repp, Minjuan Wang, Shudong Wang, and Marc Zhichang Xu, for their generous commitment of time and effort.
