Table of Contents

Foreword ........................................................................................................................................... xxiv

Preface .............................................................................................................................................. xlvii

Acknowledgment .............................................................................................................................. xlix

Section 1
Network Architectures

Roadmaps and Architectural Models

Chapter 1
Evolution of Personal Wireless Broadband Services from 3G to 4G .................................................. 1
Sudhir K. Routray, Krupajal Engineering College, India

Chapter 2
A New Global Ubiquitous Consumer Environment for 4G Wireless Communications ...................... 20
Ivan Ganchev, University of Limerick, Ireland
Máirtín S. O’Droma, University of Limerick, Ireland
Jenő István Jakab, Tecnomen Ltd, Ireland
Zhanlin Ji, University of Limerick, Ireland
Dmitry Tairov, University of Limerick, Ireland

Chapter 3
4G Access Network Architecture ....................................................................................................... 46
Young-June Choi, NEC Laboratories America, USA

Chapter 4
Architecture for IP-Based Next Generation Radio Access Network .................................................. 61
Ram Dantu, University of North Texas, USA
Parthasarathy Guturu, University of North Texas, USA

Chapter 5
Long Term Evolution (LTE): An IPv6 Perspective ................................................................................ 77
Nayef Mendahawi, Research In Motion (RIM), Ltd., Canada
Sasan Adibi, Research In Motion (RIM), Ltd., Canada
Chapter 6
HWN* Framework Towards 4G Mobile Communication Networks ............................................. 100
Chong Shen, Tyndall National Institute, Ireland
Dirk Pesch, Cork Institute of Technology, Ireland
Robert Atkinson, University of Strathclyde, Scotland
Wencai Du, Hainan University, China

Forthcoming 4G Challenges:
Problems and Solutions

Chapter 7
User Experience in 4G Networks ........................................................................................................... 125
Pablo Vidales, Deutsche Telekom Laboratories, Germany
Marcel Wältermann, Deutsche Telekom Laboratories, Germany
Blazej Lewcio, Deutsche Telekom Laboratories, Germany
Sebastian Möller, Deutsche Telekom Laboratories, Germany

Chapter 8
Fourth Generation Networks: Adoption and Dangers ........................................................................... 146
Jivesh Govil, Cisco Systems Inc., USA
Jivika Govil, Carnegie Mellon University, USA

Chapter 9
Potential Scenarios and Drivers of the 4G Evolution ............................................................................. 181
Elias Aravantinos, Stevens Institute of Technology, USA
M. Hosein Fallah, Stevens Institute of Technology, USA

Chapter 10
Knowledge Sharing to Improve Routing and Future 4G Networks ................................................. 193
Djamel F. H. Sadok, Federal University of Pernambuco, Brazil
Joselison Albuquerque de França, Federal University of Pernambuco, Brazil
Luciana Pereira Oliveira, Federal University of Pernambuco, Brazil
Renato Ricardo de Abreu, Federal University of Pernambuco, Brazil

Next Generation Technologies

Chapter 11
Personal Environments: Towards Cooperative 4G Services................................................................. 228
Tinku Rasheed, Create-Net, Italy
Usman Javaid, Vodafone Group, UK

Chapter 12
Next Generation Broadband Services from High Altitude Platforms ................................................. 249
Abbas Mohammed, Blekinge Institute of Technology, Sweden
Zhe Yang, Blekinge Institute of Technology, Sweden
Chapter 13
Radio-over-Fibre Networks for 4G................................................................. 268
  Roberto Llorente, Universidad Politécnica de Valencia, Spain
  Maria Morant, Universidad Politécnica de Valencia, Spain
  Javier Marti, Universidad Politécnica de Valencia, Spain

Section 2
Radio Access Protocols

Scheduling and Quality of Service

Chapter 14
MAC Protocol of WiMAX Mesh Network.................................................. 292
  Ming-Tuo Zhou, National Institute of Information and Communications Technology, Singapore
  Peng-Yong Kong, Institute for Infocomm Research, Singapore

Chapter 15
Advanced Scheduling Schemes in 4G Systems........................................ 313
  Arijit Ukil, Tata Consultancy Services Ltd., India

Chapter 16
End-to-End Quality of Service in Evolved Packet Systems ..................... 361
  Wei Wu, Research In Motion, Limited, USA
  Noun Choi, Research In Motion, Limited, USA

Mobility and Handover

Chapter 17
An End-to-End QoS Framework for Vehicular Mobile Networks .............. 377
  Hamada Alshaer, University of Leeds, UK
  Jaafar Elmirghani, University of Leeds, UK

Chapter 18
LTE Mobility Solutions at Network Level for Global Convergence .......... 405
  Titus-Constantin Bălan, Siemens SIS PSE, Romania
  Florin Sandu, “Transilvania” University of Brasov, Romania

Chapter 19
Handover Optimization for 4G Wireless Networks.................................... 424
  Dongwook Kim, Korea Advanced Institute of Science and Technology, South Korea
  Hanjin Lee, Korea Advanced Institute of Science and Technology, South Korea
  Hyunsoo Yoon, Korea Advanced Institute of Science and Technology, South Korea
  Namgi Kim, Kyonggi University, South Korea
Cross-Layer Designs

Chapter 20
Survey of Cross-Layer Optimization Techniques for Wireless Networks........................................453
Han-Chieh Chao, National Ilan University, Taiwan
Chi-Yuan Chang, National Dong Hwa University, Taiwan
Chi-Yuan Chen, National Dong Hwa University, Taiwan
Kai-Di Chang, National Dong Hwa University, Taiwan

Chapter 21
Cross-Layer Joint Optimization of Multimedia Transmissions over IP Based Wireless Networks ..........................................................469
Catherine Lamy-Bergot, THALES Communications S.A., France
Gianmarco Panza, CEFRIEL, Italy

Chapter 22
Video Streaming Based Services over 4G Networks: Challenges and Solutions.................................494
Elsa Mª Macías, Universidad de Las Palmas de Gran Canaria, Spain
Alvaro Suarez, Universidad de Las Palmas de Gran Canaria, Spain

Section 3
Physical Layer Advances

Advanced Multiple Access Transmission Schemes

Chapter 23
Aspects of OFDM-Based 3G LTE Terminal Implementation..........................................................526
Wen Xu, Infineon Technologies AG, Germany
Jens Berkmann, Infineon Technologies AG, Germany
Cecilia Carbonelli, Infineon Technologies AG, Germany
Christian Drewes, Infineon Technologies AG, Germany
Axel Huebner, Infineon Technologies AG, Germany

Chapter 24
The Use of Orthogonal Frequency Code Division (OFCD) Multiplexing in Wireless Mesh Network (WMN)........................................................................565
Syed S. Rizvi, University of Bridgeport, USA
Khaled M. Elleithy, University of Bridgeport, USA
Aasia Riasat, Institute of Business Management, Pakistan

Chapter 25
A New Approach to BSOFDM: Parallel Concatenated Spreading Matrices OFDM .........................582
Ibrahim Raad, University of Wollongong, Australia
Xiaoqing Huang, University of Wollongong, Australia
Chapter 26
The Next Generation CDMA Technology for Futuristic Wireless Communications:
Why Complementary Codes?

Hsiao-Hwa Chen, National Cheng Kung University, Taiwan

Enhanced Decoding Techniques

Chapter 27
Configurable and Scalable Turbo Decoder for 4G Wireless Receivers

Yang Sun, Rice University, USA
Joseph R. Cavallaro, Rice University, USA
Yuming Zhu, Texas Instruments, USA
Manish Goel, Texas Instruments, USA

Chapter 28
Parallel Soft Spherical Detection for Coded MIMO Systems

Hosein Nikopour, Huawei Technologies Co., Ltd., Canada
Amin Mobasher, Stanford University, USA
Amir K. Khandani, University of Waterloo, Canada
Aladdin Saleh, Bell Canada, Canada

Collaboration and Capacity

Chapter 29
Capacity Estimation of OFDMA-Based Wireless Cellular Networks

André Carlos Guedes de Carvalho Reis, Universidade de Brasilia, Brazil
Paulo Roberto de Lira Gondim, Universidade de Brasilia, Brazil

Chapter 30
Wireless Collaboration: Maximizing Diversity through Relaying

Patrick Tooher, Concordia University, Canada
M. Reza Soleymani, Concordia University, Canada
