Acknowledgment

Without the continual support of IGI Global, *Technoethics in an Evolving Knowledge Society* would not have been possible. This author would also like to acknowledge the important contributions from Mario Bunge, a pioneer in Technoethics. This book was inspired from the work undertaken by over 100 contributors to the *Handbook of Research on Technoethics* (2008) and ongoing contributions from the editorial and review board of the *International Journal of Technoethics* (forthcoming in 2010). A special thanks go to all those who provided constructive feedback and critical comments on earlier versions of this book. Nevertheless, this author takes full responsibility for any errors, omissions, or weaknesses in this work. It is hoped that this work provides solid grounding for developing future scholarship as the field continues to evolve.

*Sincerely,*
*Rocci Luppicini, University of Ottawa*
