Table of Contents

Foreword ........................................................................................................................................... xiii
Preface ................................................................................................................................................ xv
Acknowledgment................................................................................................................................ xx

Chapter 1
Introduction to Data Mining Methodology to Investigate Health Outcomes ........................................ 1
_Patricia Cerrito, University of Louisville, USA_

Section 1
Case Studies in Health Outcomes Research

Chapter 2
Data Mining to Examine the Treatment of Osteomyelitis .................................................................. 15
_Hamid Zahedi, University of Louisville, USA_

Chapter 3
Outcomes Research in Cardiovascular Procedures ................................................................. 47
_Fariba Nowrouzi, Kentucky State University, USA_

Chapter 4
Outcomes Research in the Treatment of Asthma ................................................................. 78
_Ram C. Neupane, College of Georgia, USA_
_Jason Turner, University of Louisville, USA_

Chapter 5
Analysis of Breast Cancer and Surgery as Treatment Options ....................................... 100
_Beatrice Ugiliweneza, University of Louisville, USA_

Chapter 6
Data Mining and Analysis of Lung Cancer ........................................................................ 118
_Guoxin Tang, University of Louisville, USA_
Chapter 7
Outcomes Research in Physical Therapy ................................................................. 145
  Jennifer Ferrell Pleiman, University of Louisville, USA

Chapter 8
Analyzing the Relationship between Diagnosis and the Cost of Diabetic Patients ........ 173
  Xiao Wang, University of Louisville, USA

Chapter 9
An Example of Defining Patient Compliance ......................................................... 197
  Christiana Petrou, University of Louisville, USA

Chapter 10
Outcomes Research in Gastrointestinal Treatment ................................................ 218
  Pedro Ramos, University of Louisville, USA

Chapter 11
Outcomes Research in Hydrocephalus Treatment ................................................ 225
  Damien Wilburn, University of Louisville, USA

Section 2
Case Studies in Healthcare Delivery

Chapter 12
Analyzing Problems of Childhood and Adolescence ............................................. 245
  Patricia B. Cerrito, University of Louisville, USA
  Aparna Sreepada, University of Louisville, USA

Chapter 13
Healthcare Delivery in a Hospital Emergency Department ................................... 275
  Joseph Twagilimana, University of Louisville, USA

Chapter 14
Utilization of the Emergency Department ............................................................. 305
  David Nfodjo, University of Louisville, USA

Chapter 15
Physician Prescribing Practices ............................................................................ 327
  Mussie Tesfamicael, University of Louisville, USA

Chapter 16
Cost Models with Prominent Outliers .................................................................. 368
  Chakib Battioui, University of Louisville, USA
Section 3
Modeling EEG Images for Analysis

Chapter 17
The Relationship between Sleep Apnea and Cognitive Functioning

M. S. S. Khan, University of Louisville, USA
