Table of Contents

Foreword .............................................................................................................................................. xix

Preface .............................................................................................................................................. xxiii

Acknowledgment ................................................................................................................................ xxvii

Section 1
Background

Chapter 1
Identifying the Emerging e-Health Technologies: To Ubiquity 2.0 and Beyond.............................. 1
Sabah Mohammed, Lakehead University, Canada
Jinan Fiaidhi, Lakehead University, Canada

Section 2
Research Issues

Chapter 2
Semantic Interoperability: Issue of Standardizing Medical Vocabularies ........................................ 19
W. Ed Hammond, Duke University, USA

Chapter 3
Personal Health Records: Status-Quo and Future Perspectives......................................................... 43
Simon Y. Liu, National Library of Medicine, USA

Chapter 4
A Framework for Privacy Assurance and Ubiquitous Knowledge Discovery in Health 2.0
Data Mashups........................................................................................................................................ 64
Jun Hu, University of Ottawa, Canada
Liam Peyton, University of Ottawa, Canada
Chapter 5
A Semantic Model to Address Health Questions to Professionals in Healthcare
Social Networks ........................................................................................................................................ 84
  Francisco Echarte, Universidad Pública de Navarra, Spain
  José Javier Astrain, Universidad Pública de Navarra, Spain
  Alberto Córdoba, Universidad Pública de Navarra, Spain
  Jesús Villadangos, Universidad Pública de Navarra, Spain

Chapter 6
An Integrated System for E-Medicine (E-Health, Telemedicine and Medical Expert Systems)........ 104
  Ivan Chorbev, Ss. Cyril and Methodius University, Republic of Macedonia
  Boban Joksimoski, European University, Republic of Macedonia

Chapter 7
Web 2.0 Approaches for Active, Collaborative Learning in Medicine and Health ......................... 127
  Eleni Kaldoudi, Democritus University of Thrace, Greece
  Stathis Konstantinidis, Aristotle University of Thessaloniki, Greece
  Panagiotis D. Bamidis, Aristotle University of Thessaloniki, Greece

Chapter 8
Integrating Medicinal Learning Objects with Daily Duties............................................................. 150
  Juha Puustjärvi, Helsinki University of Technology, Finland
  Leena Puustjärvi, The Pharmacy of Kaivopuisto, Finland

Chapter 9
Personal Health Information in the Age of Ubiquitous Health...................................................... 166
  David Wiljer, University Health Network, Canada
  Sara Urowitz, University Health Network, Canada
  Erin Jones, University Health Network, Canada

Chapter 10
Healthcare Collaborative Framework Based on Web 2.0, Grid Computing and SOA....................... 190
  Wail M. Omar, Sohar University, Sultanate of Oman

Chapter 11
An Agent-Based Architecture to Ubiquitous Health........................................................................... 213
  Daniel Ruiz Fernández, University of Alicante, Spain

Chapter 12
Semantic Web Architecture to Provide E-Health Content and Services........................................... 233
  Mahmood Tara, Mashad University of Medical Sciences, Iran
Section 3
Management Issues

Chapter 13
Mobile Virtual Communities in Healthcare: The Chronic Disease Management Case

Christo El Morr, York University, Canada

Chapter 14
Privacy Enhancing Technologies in Electronic Health Records

Christian Stingl, Carinthia University of Applied Sciences, Austria
Daniel Slamanig, Carinthia University of Applied Sciences, Austria

Chapter 15
Privacy-Based Multiagent Brokering Architecture for Ubiquitous Healthcare Systems

AbdulMutalib Masaud-Wahaishi, United Arab Emirates University, UAE
Hamada Ghenniwa, University of Western Ontario, Canada

Chapter 16
Managing E-Health in the Age of Web 2.0: The Impact on E-Health Evaluation

Benjamin Hughes, ESADE, Spain

Chapter 17
Academic Family Health Teams: Collaborative Lessons from the Far Flung North

David Topps, Northern Ontario School of Medicine, Canada

Section 4
Applications

Chapter 18
The K4Care Platform: Design and Implementation

David Isern, Universitat Rovira i Virgili, Spain
David Sánchez, Universitat Rovira i Virgili, Spain
Albert Solé-Ribalta, Universitat Rovira i Virgili, Spain
Antonio Moreno, Universitat Rovira i Virgili, Spain
László Z. Varga, Hungarian Academy of Sciences, Hungary

Chapter 19
Electronic Environments for Integrated Care Management: Case of Depression Treatment

Matic Meglič, UP PINT, Slovenia
Andrej Brodnik, UP PINT, Slovenia
Chapter 20
Building Virtual Communities for Health Promotion: Emerging Best Practices through an Analysis of the International Health Challenge & Related Literature in Second Life

Sameer Siddiqi, University of Houston, USA
Rebecca E. Lee, University of Houston, USA

Chapter 21
Dynamic Business Processes and Virtual Communities in Wireless eHealth Environments

Dimosthenis Georgiadis, University of Cyprus, Cyprus
Panagiotis Germanakis, University of Nicosia, Cyprus
Constantinos Mourlas, National & Kapodistrian University of Athens, Greece
George Samaras, University of Cyprus, Cyprus
Eleni Christodoulou, University of Cyprus, Cyprus

Chapter 22
Digital Pathology and Virtual Microscopy Integration in E-Health Records

Marcial García Rojo, Hospital General de Ciudad Real, Spain
Christel Daniel, Université René Descartes, France

Chapter 23
Content-Based Image Retrieval for Digital Mammography

Issam El Naqa, Washington University School of Medicine, USA
Liyang Wei, Hologic, Inc, USA
Yongyi Yang, Illinois Institute of Technology, USA

Chapter 24
Feature Evaluation and Classification for Content-Based Medical Image Retrieval System

Ivica Dimitrovski, Ss. Cyril and Methodius University in Skopje, Macedonia
Suzana Loskovska, Ss. Cyril and Methodius University in Skopje, Macedonia

Chapter 25
Virtual Reality as an Experiential Tool: The Role of Virtual Worlds in Psychological Interventions

Alessandra Gorini, Istituto Auxologico Italiano, Italy
Andrea Gaggioli, Istituto Auxologico Italiano, Italy
Giuseppe Riva, Istituto Auxologico Italiano, Italy

Chapter 26
Use of Clinical Simulations to Evaluate the Impact of Health Information Systems and Ubiquitous Computing Devices Upon Health Professional Work

Elizabeth M. Borycki, University of Victoria, Canada
Andre W. Kushniruk, University of Victoria, Canada
Chapter 27
Technology and Human Resources Management in Health Care

Stefane M. Kabene, University of Western Ontario, Canada
Lisa King, University of Western Ontario, Canada
Candace J. Gibson, University of Western Ontario, Canada

Section 5
The Future

Chapter 28
Enabling Technologies and Challenges for the Future of Ubiquitous Health:
The Interoperability Framework

Donald W. M. Juzwishin, Juzwishin Consulting Inc., Canada
