Table of Contents

Preface..................................................................................................................................................xiv
Acknowledgment...................................................................................................................................xxxvii

Chapter 1
Designing of E-Learning for Engineering Education in Developing Countries:
Key Issues and Success Factors ..............................................................................................................1
   B. Noroozi, University of Guilan, Iran & University of Cincinnati, USA
   M. Valizadeh, University of Guilan, Iran
   G. A. Sorial, University of Cincinnati, USA

Chapter 2
Architectural Web Portal and Interactive CAD Learning in Hungary ..............................................20
   Attila Somfai, “Széchenyi István” University, Hungary

Chapter 3
Adapting Engineering Education to the New Century ........................................................................30
   A.K. Haghi, University of Guilan, Iran
   B. Noroozi, University of Guilan, Iran & University of Cincinnati, USA

Chapter 4
3D Virtual Learning Environment for Engineering Students ............................................................42
   M. Valizadeh, University of Guilan, Iran
   B. Noroozi, University of Guilan, Iran & University of Cincinnati, USA
   G. A. Sorial, University of Cincinnati, USA

Chapter 5
Online Automated Essay Grading System as a Web Based Learning (WBL) Tool in Engineering
Education ...............................................................................................................................................53
   Siddhartha Ghosh, G. Narayananamma Institute of Technology and Science, India
Chapter 6
Future Challenges of Mobile Learning in Web-Based Instruction ....................................................... 63
    Rochelle Jones, Lockheed Martin Corporation, USA
    Chandre Butler, University of Central Florida, USA
    Pamela McCauley-Bush, University of Central Florida, USA

Chapter 7
Designing Animated Simulations and Web-Based Assessments to Improve Electrical
Engineering Education.......................................................................................................................... 77
    Doug Holton, Utah State University, USA
    Amit Verma, Texas A&M – Kingsville, USA

Chapter 8
Use of Living Systems to Teach Basic Engineering Concepts ......................................................... 96
    Kauser Jahan, Rowan University, USA
    Jess W. Everett, Rowan University, USA
    Gina Tang, Rowan University, USA
    Stephanie Farrell, Rowan University, USA
    Hong Zhang, Rowan University, USA
    Angela Wenger, New Jersey Academic for Aquatic Sciences, USA
    Majid Noori, Cumberland County College, USA

Chapter 9
The Use of Applets in an Engineering Chemistry Course: Advantages and New Ideas ............... 108
    B.M. Trigo, Polytechnic School of the University of São Paulo, Brazil
    G.S. Olguin, Polytechnic School of the University of São Paulo, Brazil
    P.H.L.S. Matai, Polytechnic School of the University of São Paulo, Brazil

Chapter 10
Competitive Design of Web-Based Courses in Engineering Education ........................................... 119
    Stelian Brad, Technical University of Cluj-Napoca, Romania

Chapter 11
WIRE: A Highly Interactive Blended Learning for Engineering Education ....................................... 149
    Yih-Ruey Juang, Jinwen University of Science and Technology, Taiwan

Chapter 12
Sights Inside the Virtual Engineering Education ................................................................................. 160
    Giancarlo Anzelotti, University of Parma, Italy
    Masuomeh Valizadeh, University of Guilan, Iran

Chapter 13
Effective Design and Delivery of Learning Materials in Learning Management Systems .................. 175
    Mehrregan Mahdavi, University of Guilan, Iran
    Mohammad H. Khoobkar, Islamic Azad University of Lahijan, Iran
Chapter 14
Web-Based Training: An Applicable Tool for Engineering Education

Masoumeh Valizadeh, University of Guilan, Iran
Giancarlo Anzelotti, University of Parma, Italy
Salesi Sedigheh, Bekaert, Kortrijk, Belgium

Chapter 15
A Diagnostic System Created for Evaluation and Maintenance of Building Constructions

Attila Koppány, Széchenyi István University, Hungary
