Acknowledgment

The editors of this book would like to thank all the people who have been directly or indirectly involved in the development of this book. First of all, we would like to thank all the authors who submitted chapters. Though the contributions were all of high quality, due to page constraints, we could not include all the chapters. Special thanks goes to all the authors whose work were finally included into the book. Next we will like to thank the editorial board members and all the reviewers who worked hard to read all the chapter submissions, provide construction suggestions, and help with the selection process. Each chapter was reviewed by at least three editorial board members or other reviewers as assigned by the board members.

We will like to give a big thanks to Professor Reinald Hartenstein, Germany who graciously accepted our invitation to write a foreword for this book. He took the pains in not only going through the chapters, but also wrote different versions of the foreword. His remarks will indeed bright light to the people wondering what this book is all about.

The authors would like to thank all the members of the Embedded Systems Laboratory, National Chung Cheng University, Taiwan, who were always supportive of this work and helped with the related logistics.

Last but not the least, Pao-Ann Hsiung would like to thank his wife Nancy Chang, daughters Alice, Phoebe, and Tiffany and son Roger for all the support that they provided during the course of editing this book. Jih-Sheng Shen would like to thank his advisor, Dr. Pao-Ann Hsiung, for giving him the opportunity to co-edit the important publication. He would also like to acknowledge the support from his father Hua-Shan Shen and his mother Yueh-Chuan Pan. The importance of their support during the period cannot be neglected. The authors would also like to thank the support from IGI Global and the assistant book development editor Joel A. Gamon.

As a final note, the authors would also like to thank the National Science Council, Taiwan for the research project grants that made possible the work included within this book.
