# Table of Contents

Foreword ............................................................................................................................................ xiii

Preface ................................................................................................................................................ xvi

Acknowledgment................................................................................................................................. xx

Chapter 1
Introduction: A Survey of the Evolutionary Computation Techniques for Software Engineering ....... 1

*Monica Chiş, Siemens IT Solutions and Services PSE, Romania*

Chapter 2
Using Evolutionary Based Approaches to Estimate Software Development Effort............................. 13

*Filomena Ferrucci, University of Salerno, Italy*

*Carmine Gravino, University of Salerno, Italy*

*Rocco Oliveto, University of Salerno, Italy*

*Federica Sarro, University of Salerno, Italy*

Chapter 3
The Application of Genetic Algorithms to the Evaluation of Software Reliability .............................. 29

*Angel Fernando Kuri-Morales, Instituto Tecnológico Autónomo de México, México*

Chapter 4
Synthesis of Object-Oriented Software Structural Models Using Quality Metrics and
Co-Evolutionary Genetic Algorithms ................................................................................................. 50

*André Vargas Abs da Cruz, Pontificia Universidade Católica do Rio de Janeiro, Brazil*

*Dilza Szwarcman, Pontificia Universidade Católica do Rio de Janeiro, Brazil*

*Thiago S. M. Guimarães, Pontificia Universidade Católica do Rio de Janeiro, Brazil*

*Marco Aurélio C. Pacheco, Pontificia Universidade Católica do Rio de Janeiro, Brazil*
Chapter 5
Application of Artificial Immune Systems Paradigm for Developing Software Fault Prediction Models
Cagatay Catal, Information Technologies Institute, Turkey
Soumya Banerjee, Birla Institute of Technology, International Center, Mauritius

Chapter 6
Genetic Programming for Cross-Release Fault Count Predictions in Large and Complex Software Projects
Wasif Afzal, Blekinge Institute of Technology, Sweden
Richard Torkar, Blekinge Institute of Technology, Sweden
Robert Feldt, Blekinge Institute of Technology, Sweden
Tony Gorschek, Blekinge Institute of Technology, Sweden

Chapter 7
Exploring a Self Organizing Multi Agents Approach for Service Discovery
Hakima Mellah, Research Centre in Scientific and Technical Information - CERIST, Algeria
Soumya Banerjee, Birla Institute of Technology, International Center, Mauritius
Salima Hassas, University of Lyon, France
Habiba Drias, USTHB, Algeria

Chapter 8
Innovative Hybrid Genetic Algorithms and Line Search Method for Industrial Production Management
Pandian Vasant, University Technology Petronas, Malaysia

Chapter 9
Automatic Test Sequence Generation for State Transition Testing via Ant Colony Optimization
Praveen Ranjan Srivastava, Birla Institute of Technology and Science (BITS), India

Chapter 10
Object Oriented Software Testing with Genetic Programming and Program Analysis
Arjan Seesing, Enigmatry, Netherlands
Hans-Gerhard Gross, Delft University of Technology, Netherlands

Chapter 11
Assessment of Software Quality: A Fuzzy Multi-Criteria Approach
Praveen Ranjan Srivastava, Birla Institute of Technology and Science (BITS), India
Ajit Pratap Singh, Civil Engineering Group, India
Vageesh K. V., Indian Institute of Management (IIM), India
Chapter 12
Verification of Attributes in Linked Lists Using Ant Colony Metaphor............................................ 220
   Soumya Banerjee, Birla Institute of Technology, International Center, Mauritius
   P. K. Mahanti, University of New Brunswick, Canada

Compilation of References .............................................................................................................. 229

About the Contributors ................................................................................................................... 250
