Table of Contents

Foreword ........................................................................................................................................... xvii

Preface .............................................................................................................................................. xxiv

Acknowledgment ............................................................................................................................. xxxi

Section 1
Sustainable Infrastructure and Technology

Chapter 1
Green Energy: Sustainable Energy Sources and Alternative Technologies................................. 1
  Wendy Miller, Queensland University of Technology, Australia
  Janis Birkeland, Queensland University of Technology, Australia

Chapter 2
Sustainable Water Provision: Challenges, Alternative Strategies and Sources
in the Era of Climate Change.................................................................................................................. 17
  Shinyi Lee, Queensland University of Technology, Australia
  Tan Yigitcanlar, Queensland University of Technology, Australia
  Prasanna Egodawatta, Queensland University of Technology, Australia
  Ashantha Goonetilleke, Queensland University of Technology, Australia

Chapter 3
The Urban Water Cycle: Towards Integrated Resource Management and More Sustainable
Water Management Systems................................................................................................................... 31
  Les Dawes, Queensland University of Technology, Australia
  Jim Reeves, Queensland University of Technology, Australia

Chapter 4
Sustainable Transport Infrastructure: Perspectives for Sustainable Urban
and Transport Development.................................................................................................................. 44
  Fatih Dur, Queensland University of Technology, Australia
  Tan Yigitcanlar, Queensland University of Technology, Australia
  Jonathan Bunker, Queensland University of Technology, Australia
Chapter 5
Green Transport Infrastructure: From Motorways to Bikeways.......................................................... 62
Kristiane Davidson, Queensland University of Technology, Australia
Ned Lukies, Queensland University of Technology, Australia
Debbie Lehtonen, Queensland University of Technology, Australia

Chapter 6
Urban Telecommunication Infrastructure Network: Technology Convergence and Urban Infrastructure........................................................................................................... 77
Tan Yigitcanlar, Queensland University of Technology, Australia
Hoon Jung Han, Griffith University, Australia

Chapter 7
Sustainable Airport Infrastructure: Balancing Infrastructures for the Airport Metropolis .................. 91
Robyn L. Keast, Queensland University of Technology, Australia
Douglas C. Baker, Queensland University of Technology, Australia
Kerry Brown, Southern Cross University, Australia

Chapter 8
Knowledge Infrastructure: Managing the Assets of Creative Urban Regions.................................. 102
Sujeeva Setunge, RMIT University, Australia
Arun Kumar, Queensland University of Technology, Australia

Section 2
Planning for Sustainable Infrastructure

Chapter 9
Planning Infrastructure: Considerations for Regional Development........................................... 118
Phil Heywood, Queensland University of Technology, Australia

Chapter 10
Information and Communication Technology as Key Infrastructure for Sustainable Cities:
The Open City Portal Approach in Nigeria............................................................................................ 131
Motoo Kusakabe, Ritsumeikan Asia Pacific University, Japan

Chapter 11
Sustainable Urban and Infrastructure Development in South East Asia:
Evidence from Hong Kong, Kuala Lumpur and Singapore................................................................. 152
Suharto Teriman, Queensland University of Technology, Australia
Tan Yigitcanlar, Queensland University of Technology, Australia
Severine Mayere, Queensland University of Technology, Australia
Chapter 12
Ubiquitous and Smart System Approaches to Infrastructure Planning:
Learnings from Korea, Japan and Hong Kong ................................................................. 165
   Sang Ho Lee, Hanbat National University, Korea
   Tan Yigitcanlar, Queensland University of Technology, Australia
   Johnny K.W. Wong, Queensland University of Technology, Australia

Chapter 13
The Ethics of Regional Water Planning: Planning and Management of Water Resources
in a Growth Region ......................................................................................................... 183
   Justine Lacey, University of Queensland, Australia
   Phil Heywood, Queensland University of Technology, Australia

Chapter 14
Challenges of Making Efficient Use of Existing Infrastructure:
Developers and Transit Oriented Development .................................................................. 201
   Eddo Coiacetto, Griffith University, Australia

Chapter 15
Contesting ‘Sustainability’ in Infrastructure Planning: The Debate of the Public Interest
in Brisbane’s Eastern Busway Development .................................................................... 213
   Kuniko Shibata, Osaka City University, Japan
   Paul Sanders, Queensland University of Technology, Australia

Chapter 16
Assessing Urban Transportation Development: Sustainable Transportation Perspectives
for Istanbul, Turkey ........................................................................................................ 231
   Azime Tezer, Istanbul Technical University, Turkey
   Care Olgun Caliskan, Istanbul Metropolitan Municipality, Turkey
   Mehmet Murat Calik, Chamber of Urban Planners, Turkey
   Serkan Sinmaz, Yildiz Technical University, Turkey

Section 3
Sustainable Infrastructure Provision, Integration and Management

Chapter 17
The Big Brother: Monitoring Urban Growth and Change for Sustainable
Infrastructure Provision ................................................................................................. 246
   Virendra Pathak, Queensland University of Technology, Australia
   Robert Webb, Queensland University of Technology, Australia
Chapter 18
Integrating Regional and Infrastructure Planning: Lessons from South East Queensland, Australia .......................................................... 259
  Michael Regan, Bond University, Australia
  Bhishna Bajracharya, Bond University, Australia

Chapter 19
Brisbane Urban Growth Model: An Integrated Infrastructure Management Framework for Brisbane, Australia ........................................................................................................ 277
  Benson Au-Yeung, City Planning Branch, Brisbane City Council, Australia
  Tan Yigitcanlar, Queensland University of Technology, Australia
  Severine Mayere, Queensland University of Technology, Australia
  Chean-Plau Lau, City Planning Branch, Brisbane City Council, Australia

Chapter 20
Value for Money: Procuring Infrastructure .................................................................................................................. 295
  Adrian J. Bridge, Queensland University of Technology, Australia
  Robert Lee Kong Tiong, Nanyang Technological University, Singapore
  Shou Qing Wang, Tsinghua University, China

Chapter 21
The Key to Successful Implementation: Project Management of Sustainable Infrastructure Provision .............................................................. 310
  Bambang Trigunarsyah, Queensland University of Technology, Australia
  Martin Skitmore, Queensland University of Technology, Australia

Afterword ........................................................................................................... 323

Compilation of References ........................................................................ 329
