Table of Contents

Preface .................................................................................................................................................. xviii

Chapter 1
Examining an Individual’s Perceived Need for Privacy and Security: Construct and Scale Development ..................................................... 1
Taner Pirim, Mississippi Center for Supercomputing Research, USA
Tabitha James, Virginia Polytechnic Institute, USA
Katherine Boswell, University of Louisiana – Monroe, USA
Brian Reithel, University of Mississippi, USA
Reza Barkhi, Virginia Polytechnic Institute, USA

Chapter 2
Forty Years of Federal Legislation in the Area of Data Protection and Information Security .......... 14
John Cassini, Université d’Angers, France
B. Dawn Medlin, Appalachian State University, USA
Adriana Romaniello, Universidad Rey Juan Carlos, Spain

Chapter 3
The Impact of Privacy Legislation on Patient Care: A Canadian Perspective .......................... 24
Jeff Barnett, University of Victoria BC, Canada

Chapter 4
A Privacy Protection Model for Patient Data with Multiple Sensitive Attributes ........................... 44
Tamas S. Gal, University of Maryland Baltimore County (UMBC), USA
Zhiyuan Chen, University of Maryland Baltimore County (UMBC), USA
Aryya Gangopadhyay, University of Maryland Baltimore County (UMBC), USA

Chapter 5
Protecting Patient Information in Outsourced Telehealth Services: Bolting on Security
When it Cannot be Baked in .................................................................................................................. 61
Patricia Y. Logan, Marshall University Graduate College, USA
Debra Noles, Marshall University Graduate College, USA
Chapter 6
Obtaining Patient’s Information from Hospital Employees through Social Engineering Techniques: An Investigative Study

B. Dawn Medlin, Appalachian State University, USA
Joseph Cazier, Appalachian State University, USA

Chapter 7
Effects of Individual Trust in Broadcast Media and the Internet on Privacy-Risking Uses of E-Health: An Expanded Analysis

E. Vance Wilson, Arizona State University, USA
David D. Dobrzykowski, Eastern Michigan University, USA
Joseph A. Cazier, Appalachian State University, USA

Chapter 8
Safeguarding the Privacy of Electronic Medical Records

Jingquan Li, Texas A&M University-San Antonio, USA
Michael J. Shaw, University of Illinois at Urbana-Champaign, USA

Chapter 9
Using Statistical Texture Analysis for Medical Image Tamper Proofing

Samia Boucherkha, Mentouri University, Algeria
Mohamed Benmohamed, Mentouri University, Algeria

Chapter 10
Privacy Inference Disclosure Control with Access-Unrestricted Data Anonymity

Zude Li, The University of Western Ontario, Canada

Chapter 11
Designing Efficient Security Services Infrastructure for Virtualization Oriented Architectures

Syed Naqvi, Senior Member IEEE

Chapter 12
Architectural Support for Enhancing Critical Secrets Protection in Chip-Multiprocessors

Lu Peng, Louisiana State University, USA
Li Yang, University of Tennessee at Chattanooga, USA
Balachandran Ramadass, Louisiana State University, USA

Chapter 13
Memory Based Anti-Forensic Tools and Techniques

Hamid Jahankhani, University of East London, UK
Elidon Beqiri, University of East London, UK
Chapter 14
Life Cycle Pattern Study of Malicious Codes

June Wei, University of West Florida, USA
Randall C. Reid, University of West Florida, USA
Hongmei Zhang, University of South Carolina, USA

Chapter 15
Trust-Based Usage Control in Collaborative Environment

Li Yang, University of Tennessee at Chattanooga, USA
Chang Phuong, University of Tennessee at Chattanooga, USA
Andy Novobilski, University of Tennessee at Chattanooga, USA
Raimund K. Ege, North Illinois University, USA

Chapter 16
Will it be Disclosure or Fabrication of Personal Information? An Examination of Persuasion Strategies on Prospective Employees

Xun Li, Nicholls State University, USA
Radhika Santhanam, University of Kentucky, USA

Chapter 17
Computer Security Practices and Perceptions of the Next Generation of Corporate Computer Users

S. E. Kruck, James Madison University, USA
Faye P. Teer, James Madison University, USA

Chapter 18
Design and Implementation of a Framework for Assured Information Sharing Across Organizational Boundaries

Bhavani Thuraisingham, The University of Texas at Dallas, USA
Yashaswini Harsha Kumar, The University of Texas at Dallas, USA
Latifur Khan, The University of Texas at Dallas, USA

Chapter 19
A Secure and Trustful E-Ordering Architecture (TOES) for Small and Medium Size Enterprises (SMEs)

Spyridon Papastergiou, University of Pireaus, Greece
Despina Polemi, University of Pireaus, Greece

Chapter 20
SEACON: An Integrated Approach to the Analysis and Design of Secure Enterprise Architecture-Based Computer Networks
Chapter 21
Spam Classification Based on E-Mail Path Analysis................................................................. 332
  Srikanth Palla, University of North Texas, USA
  Ram Dantu, University of North Texas, USA
  João W. Cangussu, University of Texas at Dallas, USA

Chapter 22
A Decentralized Security Framework for Web-Based Social Networks ..................................... 356
  Barbara Carminati, Università degli Studi dell’Insubria, Italy
  Elena Ferrari, Università degli Studi dell’Insubria, Italy
  Andrea Perego, Università degli Studi dell’Insubria, Italy

Compilation of References ........................................................................................................... 388

About the Contributors .................................................................................................................. 414
