# Table of Contents

Preface .................................................................................................................................................. xvi

Acknowledgment ................................................................................................................................ xx

**Section 1**  
**Intelligent Tutoring Systems Architectures**

**Chapter 1**  
Intelligent Tutoring Systems: Best Practices ......................................................................................... 1  
*Aytaḥr Keleş, Atatürk University, Turkey*  
*Ali Keleş, Atatürk University, Turkey*

**Chapter 2**  
Design Methodology of an Intelligent Learning Environment Applied to the Non Violent Conflict Resolution Education ........................................................................................................... 27  
*G. M. Curilem, Universidad de La Frontera, Chile*  
*B. Vizcarra, Universidad de La Frontera, Chile*  
*A. M. Poo, Universidad de La Frontera, Chile*  
*D. Huenteñan, Correo Gorbea, Chile*  
*L. M. Brasil, University of Brasilia, Brazil*

**Chapter 3**  
Enhancing Intelligent Tutoring Systems with the Agent Paradigm .............................................................. 46  
*Xin Bai, City University of New York, USA*  
*John B. Black, Columbia University, USA*

**Chapter 4**  
Intelligent Tutoring System Architecture Rebuilt: A Pattern Approach ..................................................... 70  
*Alke Martens, University of Rostock, Germany*  
*Andreas Harrer, Catholic University of Eichstätt-Ingolstadt, Germany*
Section 2

E-Learning Communities Technologies

Chapter 5
Virtual Learning Environment ................................................................. 87
Saša Mladenović, University of Split, Croatia
Haidi Kuvač, University of Split, Croatia
Maja Štula, University of Split, Croatia

Chapter 6
Mobile Learning .................................................................................. 103
Marija Zelić, University of Split, Croatia

Section 3

Intelligent E-Learning in Different Domains

Chapter 7
E-Learning with Affective Tutoring Systems ........................................ 129
Abdolhossein Sarrafa-zadeh, Unitec, New Zealand
Jamshid Shanbehzadeh, Tarbiat Moalem University, Iran
Scott Overmyer, Baker College, USA

Chapter 8
E-Learning through Gaming: Unfolding Childrens’ Negotiation Skills ........ 141
Jeroen Geuze, Donders Institute for Brain Cognition and Behaviour, The Netherlands
Egon L. van den Broek, Human-Centered Computing Consultancy, The Netherlands

Chapter 9
Intelligent Tutoring System for Learning Programming ...................... 166
Tonći Dadić, University of Split, Croatia

Chapter 10
Overlay Method in Testing Knowledge by Natural Language Dialogue ....... 187
Branko Žitko, University of Split, Croatia

Section 4

Personalized Advanced E-Learning Environments

Chapter 11
Student Modeling in an Intelligent Tutoring System ......................... 208
Mingyu Feng, SRI International, USA
Neil Heffernan, Worcester Polytechnic Institute, USA
Kenneth Koedinger, Carnegie Mellon University, USA
Chapter 12
Using Effect Size for Group Modeling in E-Learning Systems .......................................................... 237
   Divna Krpan, University of Split, Croatia
   Suzana Tomaš, University of Split, Croatia
   Roko Vladašić, University of Split, Croatia

Chapter 13
A Personalized Learning System Based on Semantic Web Technologies ............................................. 258
   Funda Dağ, University of Kocaeli, Turkey
   Kadir Erkan, University of Kocaeli, Turkey

Chapter 14
A Survey of Optimized Learning Pathway Planning and Assessment Paper Generation with Swarm Intelligence ................................................................................................................................................ 285
   Lung-Hsiang Wong, National Institute of Education, Singapore
   Chee-Kit Looi, National Institute of Education, Singapore

Section 5
E-Learning Systems Effectiveness

Chapter 15
Factors Determining the Overall Effectiveness of E-Learning Systems used in Higher Education ................................................................. 303
   Benedict du Boulay, University of Sussex, UK
   Julie Coultas, University of Sussex, UK
   Rosemary Luckin, London Knowledge Laboratory, UK
   Fred Garnett, London Knowledge Laboratory, UK

Chapter 16
   Ani Grubišić, University of Split, Croatia

Chapter 17
Assessment of the Effectiveness of Distance Learning Courses and of Interactive Processes in Virtual Learning Environments ........................................................................................................ 342
   Francisco Villa Ulhôa Botelho, Universidade Católica de Brasília, Brasil
   Rosa Maria Vicari, Universidade Federal do Rio Grande do Sul, Brasil
