Geographic Information Systems and Health Applications

Table of Contents

Foreword .......................................................................................................................... viii
Ric Skinner, Baystate Medical Center, USA

Preface .......................................................................................................................... x
Omar A. Khan, Johns Hopkins University School of Public Health, USA

SECTION I: HEALTH DISPARITIES & COMMUNITY HEALTH ISSUES

Chapter I. Race, Class and Place: Directions for the Future of Public Health .......................................................................................................................... 1
Gregory Pappas, Macro International, Inc., USA
Mohammed Akhter, American Public Health Association, USA

Chapter II. Understanding Health Disparities Through Geographic Information Systems .................................................................................................................. 12
Samuel Soret, Loma Linda University, USA
Karl J. McCleary, The Pennsylvania State University, USA
Patrick A. Rivers, Arizona State University, USA
Susanne B. Montgomery and Seth A. Wiafe, Loma Linda University, USA
Chapter III. Using a GIS and the American Community Survey to Address Community Health Problems ................................................ 43
  Jane L. McCall, Amy K. Pasini and Richard B. Wait,
  Baystate Medical Center GIS Program, USA

Chapter IV. The Application of Spatial Analysis to the Public Health Understanding of Alcohol and Alcohol-Related Problems .......... 57
  Robert Lipton, Prevention Research Center, USA
  D. M. Gorman, The Texas A&M University System Health Science Center, USA
  William F. Wieczorek, Buffalo State College-State University of New York, USA
  Paul Gruenewald, Prevention Research Center, USA

SECTION II: GIS & CANCER

Chapter V. The New Kid on the Block: A Look at How Geographic Information Systems are Changing the Face of Cancer Research ... 81
  Jane L. McCall, Baystate Medical Center GIS Program, USA

Chapter VI. Community Breast Cancer Mapping in Huntington, Long Island .......................................................................................... 97
  Scott Carlin, Southampton College, Long Island University, USA

Chapter VII. Application of a GIS-Based Statistical Method to Assess Spatio-Temporal Changes in Breast Cancer Clustering in the Northeastern United States ........................................................ 114
  Daikwon Han and Peter A. Rogerson, SUNY at Buffalo, USA

Chapter VIII. Geographical Analysis of Disease in Small Areas Using Hierarchical Bayesian Models: Mapping Men’s Lung Cancer Mortality in Galicia, Spain .............................................................. 139
  C. L. Vidal-Rodeiro, University of Aberdeen, UK
  M. I. Santiago-Pérez and E. Vázquez-Fernández, Public Health Department of Galicia, Santiago de Compostela, Spain
  M. E. López-Vizcaíno, Galician Statistical Institute, Santiago de Compostela, Spain
  X. Hervada-Vidal, Public Health Department of Galicia, Santiago de Compostela, Spain
SECTION III: INFECTIOUS DISEASE & INTERNATIONAL HEALTH

Chapter IX. Using Hierarchical Nearest Neighbor Analysis and Animation to Investigate the Spatial and Temporal Patterns of Raccoon Rabies in West Virginia ..................................................... 155
   Andrew Curtis and Michael Leitner, Louisiana State University, USA
   Cathleen Hanlon, U.S. Centers for Disease Control and Prevention, USA

Chapter X. Spatial Cluster Analysis for Etiological Research and Identification of Socio-Environmental Risk Factors ......................... 172
   Michael Emch, Portland State University, USA
   Mohammad Ali, International Vaccine Institute, Korea

Chapter XI. The Use of GIS and Remote Sensing in Schistosomiasis Control in China ................................................................. 188
   Edmund Y. W. Seto and Bing Xu, University of California at Berkeley, USA
   Weiping Wu, Shanghai Institute of Parasitic Disease, PC China
   George Davis, Institute of Malacology, USA
   Dongchuan Qiu and Xueguang Gu, Sichuan Institute of Parasitic Disease, PC China
   Peng Gong and Robert C. Spear, University of California at Berkeley, USA

Chapter XII. Bacterial Source Tracking of Nonpoint Source Pollution Using GIS and DNA Fingerprinting Technologies .................... 208
   M. E. Folkoff, E. A. Venso, D. W. Harris, M. F. Frana and M. S. Scott, Salisbury University, USA

Chapter XIII. Spatial Modeling of Risk Factors for Gender-Specific Child Mortality in a Rural Area of Bangladesh ............................. 223
   Mohammad Ali, International Vaccine Institute, Korea
   Christine Ashley, University of Minnesota, USA
   M. Zahirul Haq and Peter Kim Streatfield, International Centre for Diarrheal Disease Research, Bangladesh
SECTION IV: HOSPITALS & HEALTHCARE

Chapter XIV. Using GIS to Unveil Distance Effects on Hospitalizations in Victoria ............................................................... 243
   Ge Lin, West Virginia University, USA

Chapter XV. Spatial Accessibility to Primary Care and Physician Shortage Area Designation: A Case Study in Illinois with GIS Approaches ................................................................. 260
   Wei Luo and Fahui Wang, Northern Illinois University, USA

Chapter XVI. Using GIS with Publicly Available Data for Hospital Market Share Analysis .......................................................... 279
   Evan R. Wolarsky, Healthcare Consultant, USA

Chapter XVII. Mapping Accessibility to General Practitioners ..... 289
   Lars Brabyn and Paul Gower, University of Waikato, New Zealand

About the Authors ......................................................................................... 308

Index ................................................................................................................. 321
