The editor gladly acknowledges the persistent support and generous assistance from all authors, advisors and reviewers involved in the entire accumulation of manuscripts, review process, revision and finalization of the cases, without which the project could not have been satisfactorily completed. He would like to thank Nilsun Sariyer for her comprehensive revision of the manuscript, Tolga Demirbas for his relentless support in reviewing late submitted manuscript, and good old friends Kam Hou Vat and Abdul Raufu Ambali for their continuous support in providing quality manuscripts.

Special thanks go to the enthusiastic publishing team at IGI Global. Particularly to Elizabeth Ardner, and Joel Gamon for their continuous suggestions, enthusiastic supports, authentic feedbacks and committed co-operations for keeping the project on schedule, and to Mehdí Khosrow-Pour, Jan Travers and Kristin Klinger for their everlasting professional guidance. Finally, sincere thanks go to my family, friends and colleagues for their love and support throughout this period.
