Acknowledgment

Thanks to the many authors of the chapters included in this text. Their dedication to craft and learners is admirable. The experience of collaborating with these talented authors, sight-unseen and across distances, is very much a sign-of-the-times and the nature of virtual work today. Interestingly enough, this still involved a fair amount of coordination and last-minute work and stretched deadlines. Their rigorous peer critiques for each other’s works enhanced the book and each other’s skill sets. All top-level professionals, these authors demonstrated their ability to deliver on their initial chapter proposals even though they maintain many other professional and personal commitments. A byproduct of every collaborative work involves increased professional relationships and honed skills, and I think that occurred with Virtual Immersive and 3D Learning Spaces: Emerging Technologies and Trends as well.

Thanks also to the Editorial Advisory Board that helped find potential writers for this work. The members are as follows:

Editorial Advisory Board Members

- Geraldine Clarebout, University of Leuven, Belgium
- Jan Elen, University of Leuven, Belgium
- Esmahi Larbi, Athabasca University, Canada
- Iris Totten, Kansas State University, USA
- Fuhua Lin, Athabasca University, Canada
- Edgar Weippl, Vienna University of Technology and Science, Austria

IGI Global has been a wonderful publisher with a strong team that helps make projects come together smoothly and professionally. I want to thank Christine Bufton and Dave DeRicco especially for their consistent and friendly hands-on help. I want to thank the many others who worked behind-the-scenes at this publisher to handle the many details necessary to create, evolve, market, and distribute this book to a global audience.

Shalin Hai-Jew
Kansas State University, USA
