Table of Contents

Preface ....................................................................................................................................................... xi

Chapter 1
Techniques for Medical Image Segmentation: Review of the Most Popular Approaches .................... 1
  Przemyslaw Lenkiewicz, University of Beira Interior & Microsoft Portugal, Portugal
  Manuela Pereira, University of Beira Interior, Portugal
  Mário Freire, University of Beira Interior, Portugal
  José Fernandes, Microsoft Portugal, Portugal

Chapter 2
Medical Image Segmentation and Tracking Through the Maximisation or the Minimisation of Divergence Between PDFs ........................................................................................................... 34
  S. Jehan-Besson, Laboratoire LIMOS CNRS, France
  F. Lecellier, Laboratoire GREYC CNRS, France
  J. Fadili, Laboratoire GREYC CNRS, France
  G. Née, Laboratoire GREYC CNRS, France & General Electric Healthcare, France
  G. Aubert, Laboratoire J.A. Dieudonné, France

Chapter 3
Modeling and Simulation of Deep Brain Stimulation in Parkinson’s Disease ........................................... 62
  T. Heida, University of Twente, The Netherlands
  R. Moroney, University of Twente, The Netherlands
  E. Marani, University of Twente, The Netherlands

Chapter 4
High-Performance Image Reconstruction (HPIR) in Three Dimensions.............................................. 121
  Olivier Bockenbach, RayConStruct GmbH, Germany
  Michael Knaup, University of Erlangen-Nürnberg, Germany
  Sven Steckman, University of Erlangen-Nürnberg, Germany
  Marc Kachelrieß, University of Erlangen-Nürnberg, Germany
Chapter 5
Compression of Surface Meshes
Frédéric Payan, Université de Nice - Sophia Antipolis, France
Marc Antonini, Université de Nice - Sophia Antipolis, France

Chapter 6
The Role of Self-Similarity for Computer Aided Detection Based on Mammogram Analysis
Filipe Soares, University of Beira Interior, Portugal & Siemens S.A., Portugal
Mário M. Freire, University of Beira Interior, Portugal
Manuela Pereira, University of Beira Interior, Portugal
Filipe Janela, Siemens S.A., Portugal
João Seabra, Siemens S.A., Portugal

Chapter 7
Volumetric Texture Analysis in Biomedical Imaging
Constantino Carlos Reyes-Aldasoro, The University of Sheffield, UK
Abhir Bhalerao, University of Warwick, UK

Chapter 8
Analysis of Doppler Embolic Signals
Ana Leiria, Universidade do Algarve, Portugal
M. M. M. Moura, Universidade do Algarve, Portugal

Chapter 9
Massive Data Classification of Neural Responses
Pedro Tomás, INESC-ID/IST TU Lisbon, Portugal
Aleksandar Ilic, INESC-ID/IST TU Lisbon, Portugal
Leonel Sousa, INESC-ID/IST TU Lisbon, Portugal

Selected Readings

Chapter 10
Combining Geometry and Image in Biomedical Systems: The RT TPS Case
Thomas V. Kilindris, University of Thessaly, Greece
Kiki Theodorou, University of Thessaly, Greece
Chapter 11
Image Registration for Biomedical Information Integration

Xiu Ying Wang, The University of Sydney, Australia
Dagan Feng, The University of Sydney, Australia & Hong Kong Polytechnic University, Hong Kong
