Table of Contents

Foreword ........................................................................................................................................... xiv

Preface ................................................................................................................................................ xvi

Acknowledgment ............................................................................................................................ xvii

Section 1
Epistemology and Current Nursing Assumption

Chapter 1
Nursing Knowledge: Practice and Practical Knowing ................................................................. 1
   Michael Carey, University of Technology Sydney, Australia
   Cheryl Waters, University of Technology Sydney, Australia
   Andrew Cashin, Southern Cross University, Australia

Chapter 2
Word Power and Linguistic Constructs in Nursing ............................................................... 17
   Andrew Cashin, Southern Cross University, Australia

Chapter 3
Communication and Nursing Relationships ....................................................................... 25
   Kyung Rim Shin, Ewha Womans University, South Korea
   Dukyoo Jung, Ewha Womans University, South Korea
   Su Jin Shin, Soon Chun Hyang University, South Korea

Chapter 4
Praxis: The Essential Nursing Construct ......................................................................... 40
   Cathrine Fowler, University of Technology Sydney, Australia
   Denise McGarry, Northern Sydney Central Coast Health, Australia
Chapter 5
The Nature of Nursing Work ................................................................. 51
Iain W. Graham, Southern Cross University, Australia

Chapter 6
Translation of Evidence into Practice .................................................... 64
Steve Campbell, University of New England, Australia

Section 2
Nursing Informatics

Chapter 7
Nursing Informatics History and its Contributions to Nursing Knowledge .................. 78
Heather Strachan, eHealth Directorate, Scottish Government, UK
Peter Murray, International Medical Informatics Association (IMIA), UK
William Scott Erdley, St. John Fisher College, USA

Chapter 8
Are Nurses Prepared for Engagement to Evidence-Based Practice with New Technologies? .... 98
Kaija Saranto, University of Eastern Finland, Finland
Virpi Jylha, University of Eastern Finland, Finland
Ulla-Mari Kinnunen, University of Eastern Finland, Finland

Chapter 9
Implications for Nursing Research and Generation of Evidence........................................ 113
Suzanne Bakken, Columbia University, USA
Robert Lucero, Columbia University, USA
Sunmoo Yoon, Columbia University, USA
Nicholas Hardiker, University of Salford, UK

Chapter 10
Ethical Considerations of Nursing Informatics .................................................. 128
Roy L. Simpson, Cerner Corporation, USA

Chapter 11
Nursing, Information Technology and the Humanization of Health Care ...................... 135
Mike Hazelton, The University of Newcastle, Australia
Peter Morrall, University of Leeds, UK

Chapter 12
Telenursing: Nursing Informatics in Practice .................................................. 150
Sisira Edirippulige, The University of Queensland, Australia
Section 3
Praxis in Practice

Chapter 13
Case Study: Developing Clinical Utility for Mental Health Outcome Information: A New Zealand Perspective ................................................................. 163
   Mark Smith, Te Pou–The National Centre for Mental Health Research, Information and Workforce Development, New Zealand

Chapter 14
Case Study: Lessons Learned when Embedding Evidence-Based Knowledge in a Nurse Care Planning and Documentation System ......................................................... 174
   Judy Murphy, Aurora Health Care, USA
   Ellen Harper, Cerner Corporation, USA
   Elizabeth C. Devine, University of Wisconsin–Milwaukee, USA
   Laura J. Burke, Aurora Health Care, USA
   Mary L. Hook, Aurora Health Care, USA

Chapter 15
Case Study: Mental Health Emergency Care Rural Access Project: Assessing Rural and Remote Emergency Mental Health in Western New South Wales Australia by Videoconference Technology ........................................ 191
   E. Saurman, University of Sydney, Australia
   D. Perkins, University of Sydney, Australia
   D. Lyle, University of Sydney, Australia
   M. Patfield, Greater Western Area Health Service, Australia
   R. Roberts, Greater Western Area Health Service, Australia

Chapter 16
Case Study: Lecturer-Student Perspective of Virtual Learning Environment ........................................ 204
   Sam Chenery-Morris, University Campus Suffolk, UK
   Catherine Thoedoris, University Campus Suffolk, UK

Chapter 17
Case Study: Research Matchmaker, an Advanced Nursing Practice Informatics Application .............................................................. 217
   Gail Heaberg, AIS for Health, Inc, USA & Georgia Southern University, USA
