Table of Contents

Preface .............................................................................................................................................. xvii

Acknowledgment .................................................................................................................................. xxiv

Chapter 1
Multi-Agent Reconfigurable Embedded Systems: From Modelling to Implementation.................. 1
Mohamed Khalgui, Xidian University, China

Chapter 2
Multithreaded Programming of Reconfigurable Embedded Systems............................................. 31
Jason Agron, University of Arkansas, USA
David Andrews, University of Arkansas, USA
Markus Happe, University of Paderborn, Germany
Enno Lübbers, University of Paderborn, Germany
Marco Platzner, University of Paderborn, Germany

Chapter 3
Zero-Downtime Reconfiguration of Distributed Control Logic in Industrial Automation and Control.......................................................... 55
Thomas Strasser, Austrian Institute of Technology, Austria
Alois Zoitl, Vienna University of Technology, Austria
Martijn Rooker, PROFACTOR GmbH, Austria

Chapter 4
Hardware Virtualization on Dynamically Reconfigurable Processors........................................ 82
Christian Plessl, University of Paderborn, Germany
Marco Platzner, University of Paderborn, Germany

Chapter 5
Measurement-Based Timing Analysis for Reconfigurable Embedded Systems............................ 110
Raimund Kirner, University of Hertfordshire, UK
Sven Bünte, Technische Universität Wien, Austria
Michael Zolda, Technische Universität Wien, Austria
Chapter 6
Trends in Reconfigurable Embedded Systems

C. Valderrama, University of Mons, Belgium
L. Jojczyk, University of Mons, Belgium
P. Possa, University of Mons, Belgium

Chapter 7

Laurent George, University of Paris-Est – Val de Marne, France
Pierre Courbin, LACSC – ECE Paris, France

Chapter 8
On Model-Driven Engineering of Reconfigurable Digital Control Hardware Systems

Tomás Balderas-Contreras, National Institute for Astrophysics, Optics and Electronics, Mexico
Gustavo Rodriguez-Gomez, National Institute for Astrophysics, Optics and Electronics, Mexico
René Cumplido, National Institute for Astrophysics, Optics and Electronics, Mexico

Chapter 9
A Design Methodology of MIN-Based Network for MPPSoC on Reconfigurable Architecture

Y. Aydi, University of Sfax, Tunisia
M. Baklouti, University of Sfax, Tunisia & University of Lille, France
Ph. Marquet, University of Lille, France
M. Abid, University of Sfax, Tunisia
J. L. Dekeyser, University of Lille, France

Chapter 10
Reconfigurable Embedded Control Systems

Mohamed Khalgui, Xidian University, China
Olfa Mosbahi, Martin Luther University, Germany

Chapter 11
Performance Analysis of FPGA Architectures based Embedded Control Applications

Slim Ben Othman, National Institute of Applied Sciences and Technology (INSAT), Tunisia
Ahmed Karim Ben Salem, National Institute of Applied Sciences and Technology (INSAT), Tunisia
Slim Ben Saoud, National Institute of Applied Sciences and Technology (INSAT), Tunisia

Chapter 12
FPGA-Based Accelerators for Bioinformatics Applications

Alba Cristina Magalhaes Alves de Melo, University of Brasilia, Brazil
Nahri Moreano, Federal University of Mato Grosso do Sul, Brazil

Chapter 13
Formal Analysis of Real-Time Systems

Osman Hasan, National University of Science and Technology (NUST), Pakistan
Sofiène Tahar, Concordia University, Canada
Chapter 14
Formal Methods for Verifications Of Reactive Systems ................................................................. 376
  Olfa Mosbahi, Nancy University, France & Martin Luther University, Germany
  Mohamed Khalgui, Xidian University, China

Chapter 15
Petri Net Based Deadlock Prevention Approach for Flexible Manufacturing Systems ............... 416
  Chunfu Zhong, Xidian University, People’s Republic of China
  Zhiwu Li, Xidian University, People’s Republic of China

Chapter 16
Choosing the Optimized OS for an MPSoC Embedded System .................................................. 434
  Abderrazak Jemai, National Institute of Applied Science and Technology, Tunisia

Chapter 17
Specification and Validation of Real Time Systems ...................................................................... 444
  Olfa Mosbahi, Campus Universitaire, Tunisia

Chapter 18
Flexible Implementation of Industrial Real-Time Servo Drive System ........................................ 476
  Ahmed Karim Ben Salem, National Institute of Applied Sciences and Technology, Tunisia
  Hedi Abdelkrim, National Institute of Applied Sciences and Technology, Tunisia
  Slim Ben Saoud, National Institute of Applied Sciences and Technology, Tunisia

Chapter 19
A Model-Based Approach to Configure and Reconfigure Avionics Systems .............................. 509
  Julien Delange, TELECOM ParisTech, France
  Laurent Pautet, TELECOM ParisTech, France
  Fabrice Kordon, Université P. & M. Curie, France

Chapter 20
Iterative Knowledge Based Embedded Systems Development Framework ................................. 542
  Goh Kiah Mok, Singapore Institute of Manufacturing Technology, Singapore
  Benny Tjahjono, Cranfield University, UK
  Ding Wei, Penn State University, USA

Compilation of References ............................................................................................................. 567

About the Contributors .................................................................................................................. 609

Index ............................................................................................................................................. 619
